

## Package Change / Improvement Notification Follow-up

January 19, 2016

Dear Valued Customer:

As in the previous letter (dated August 12<sup>th</sup>), we would like to provide an update on the packaging enhancements made to all ProSNS and Double Bubble connectors from PPC/Belden. In addition we will provide a product ordering cross reference. **The cross reference can be found on pages two through four. The attached cross reference will show both old and new part numbers and ordering qty. When ordering please note the difference in order quantity between old and new packaging.**

We consolidated our retail and non-retail packaging of connectors into a single premium retail bag. This bag is a high quality polymer with a re-sealable zip-top. In addition to moving from two packages to one, the shelf space and shipping packages are significantly more efficient.

In order to accommodate all of our customers/distributors we modified our part number and bar codes for the new packaging. The image below shows the difference between the old and new style packaging.

Left: Old packaging (generic Zip-top and tube). Right: New Packaging

Belden  
2200 U.S. Highway 27 South  
PO Box 1980  
Richmond, IN 47374-7279
