Perfectly equipped for audio editing

From LP and tape to MP3, CD or your car stereo!

Developed for audio editing and recordings

MAGIX Audio Cleaning Lab 17 deluxe is an excellent tool to digitize and optimize both old and new music. Loaded with great functions that allow you to burn to CD, back it up to your computer's hard drive, or simply transfer it to your iPod® (or any other mobile device), creating flawless sound has never been so easy!

This audio editing software also offers all major functions for editing MP3s, optimizing or converting other audio files, and recording speech. User friendliness and sound quality are a top priority at all times!

The Northern Echo

The Northern Echo (UK), 26/05/2010
"For me, it remains the standard by which all other home audio editing apps must be judged."

Computer Shopper (UK), Issue 267
4/5; "Audio Cleaning Lab makes audio recordings sound as shiny & loud as possible..."

micro mart (UK), Issue 1106
Editors Choice Award 9/10;
"A great and inexpensive program that can work wonders for audio files..."

PC Utilities (UK), Issue 128
80%; "Capturing, cleaning and re-mastering audio recordings doesn't come much easier than this..."

Press comments refer to the previous version MAGIX Audio Cleaning Lab 16 deluxe.

Transfer your favorite music to the hard drive, your iPod®, or CD & DVD

Enjoy old songs from records & tapes on the go on your MP3 player and iPod® or on CD on your stereo system. With just a few clicks, you can record individual songs, entire albums or samplers and digitize your favorite music on analog storage media.

PLUS! Create high-quality voice recordings for your own podcasts, spoken memos, voice overs on video, etc.

PRACTICAL! Record everything processed by the sound card

MAGIX Audio Cleaning Lab 17 deluxe not only offers you the possibility to record audio from external sources, but also to record whatever your sound card picks up. This enables you to record web radio, music videos from YouTube®, MySpace™ or other portals and to save the songs as MP3s or burn them as an audio CD.

Tip! If you own a DJing program or spin records yourself, you can easily use the program to record your DJ mixes, save them as MP3 files or burn them to CD. The practical part is that you can select and skip the tracks on the finished CD. Of course, you can also use MAGIX Audio Cleaning Lab 17 to digitize your precious records.

NEW! Intelligent start dialog with presets that let users immediately begin any task

The new, intelligent start dialog offers ideal support for all tasks, whether you want to digitize records, tapes or speech, remove noise from a recording or optimize the sound of an MP3 file.

The audio program automatically adjusts all settings depending on what you want to do. This way, you can start recording or optimizing your sound immediately and won't lose time clicking through dialogs and adjusting program settings!

Tips & tricks for audio editing

Discover audio editing at the highest level – and with the easiest handling. The info box, an integrated direct help feature, offers useful information and helps you edit your recordings. It explains all effects and their functionality in a straightforward way so you will be able to achieve optimum results without having to familiarize yourself with the program for a long time.

All of the audio tools work just the way you want them to: fully automatic, step-by-step, or completely individually. The program will never leave you without help, no matter what you have planned for your audio material.

Ideal for editing recordings and cutting music

Cut & copy songs and recordings and add effects – everything is so easy that no time is required to learn. Even professional, detailed editing is possible!

Even more specialized tasks can be carried out with ease by this advanced program: Edit the track information for individual MP3s and complete it automatically. The volume of background music can be adjusted for spoken recordings automatically – ideal for podcasts and voice overs on video.

IMPROVED! Even faster results

Thanks to the practical overview track, you're in control at all times, even while digitizing and editing long audio recordings such as LPs, mix tapes or web radio recordings.

With the improved audio file display, you can see at a glance where a new track begins. This allows you to jump from song to song quickly and easily and to efficiently edit the sound of your recordings.

Put an end to bothersome noise – restoring your favorite music can be so easy!

Distortions, crackling vinyl, hissing, cracks, humming, and any other noise can be filtered out with ease and the quality of recordings improved greatly. You can even add lost overtones, correct wrong tempo, or optimize the peak control – all without any prior skills.

IMPROVED! With Audio Cleaning Lab's professional audio effects you can remove any audio errors caused by turntable needles, footsteps, or wind noise.

IMPROVED! More presets for cleaning and optimizing music, speech, and other audio recordings

Specialized tools usually require specialized knowledge to achieve perfect results. With MAGIX Audio Cleaning Lab 17 deluxe it's different – thanks to the included presets you can use professional audio tools without any prior skills.

Our experienced audio professionals have included presets for all major effects and applications, allowing you to immediately start editing your audio material with effects such as StereoFX, Denoiser, compressor, DeClipper, etc.

Automatic or step-by-step mode: Sound cleaning & mastering

Even after digitizing your records and cassettes, the same background noise might still be present. This is where the automatic cleaning assistant comes into the picture. It automatically detects the most common audio defects and knows exactly what to do to optimize the sound and remove noise.

For users who do not want to use the automatic optimization feature, the program also offers a step-by-step mode. You can specify different settings one after the other and preview and optimize the material with ease – this allows you to stay in full control of all cleaning and mastering tools even without prior skills!

Pro Audio technology for flawless sound

Get the technology used by top producers and leading broadcasting stations for your audio editing workflow at home!

MAGIX Audio Cleaning Lab 17 deluxe is based on high-quality audio technology used in the professional audio programs Samplitude & Sequoia.

Sound, just as it should be: crystal-clear, powerful, brilliant, and full of detail. Enjoy the unforgettable sound experience!

Professional audio engine

Precise and high-quality conversion of CDs to MP3 format and many other formats. High-quality effects for compression, brilliance, and more.

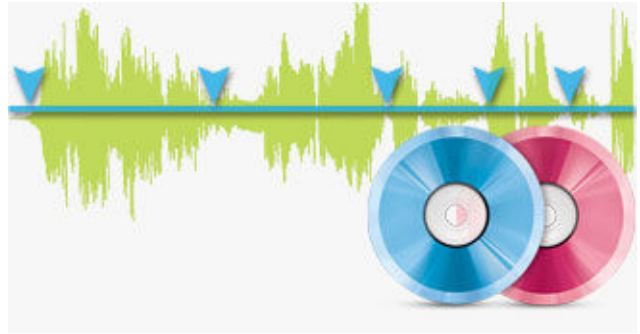

Optimize all of your MP3s at once

Do you have a digital music collection on your PC? Experience your favorite songs in a new quality! Edit your songs in one go with the practical batch processing feature.

MAGIX Audio Cleaning Lab 17 deluxe finally makes poor sound resulting from MP3 compression a thing of the past! Polish up your digital music archive with a single click.

Assistant for creating audio CDs with track markers

The track marker assistant is useful if you want to burn your recordings to CD or export all of the audio files individually, because it automatically detects where a new song begins and adds a marker at that position. This way, you can burn audio CDs with individual tracks that you can select and skip when you play them on a CD player. It also greatly simplifies navigation within the program.

Burn audio CDs or data DVDs, MP3s, and many other audio formats

To enjoy your complete music collection consisting of LPs, cassettes, and other audio media digitally on a CD player, simply burn your recordings onto CD with a single click. If you like it compact, MAGIX Audio Cleaning Lab 17 deluxe offers you an especially practical solution: Up to 100 hours of music can be burned to a single DVD in MP3 format!

TIP! Thanks to the practical export function, you can now experience your music collection on the go – on your smartphone, **iPod®** or **MP3 player!**

magix.info – the Multimedia Community
