Fun on the web, the way you want it

HTC Desire HD has a super-fast 1Ghz processor to take you anywhere online in seconds, plus a clever zoom that automatically reflows text and images to fit your screen. Because the internet should work around you. Not vice versa.

See everything on the big screen

Gone are the days of squinting at tiny screens and missing all-important details. Now, with the HTC Desire HD, you can experience a truly great browsing experience on its large 4.3" screen. With added features like pin-sharp text display, vivid photos and vibrant video, the HTC Desire HD is designed to enhance your favourite websites, YouTube clips and Facebook photos.

Your memories, now in HD

Some moments you never want to forget. So capture them with HTC Desire HD's high definition video camera. Then relive and share every detail in HD on your TV, long after the memories have faded.

Keep a cinema in your pocket

With its vivid 4.3" screen and Dolby Mobile and SRS audio, HTC Desire HD makes every day epic. Watch a Hollywood blockbuster on the bus. Première your home videos in your lunch break. Because with HTC Desire HD, wherever you are, you're at the movies.

Never get lost again

With maps you can download for free, there's no more waiting for sections to load. HTC Desire HD even turns the map to face the same way you're facing. But if you still can't find your way, the friendly voice in Google Maps™ Navigation will give you turn-by-turn directions.

Mozart or Motorhead?

We all have different tastes in music. Let HTC Desire HD help you get the most out of yours. Make playlists on the go, set your favourite song as your ringtone, expand your collection with great music apps, then listen to it all in mind-blowing Dolby Mobile and SRS audio.

A phone that's good for your brain

Of course, HTC Desire HD brings you whatever you're looking for on the web in seconds. But on top of that, you can add tonnes of apps to make expanding your grey matter quicker and more fun than ever.

Explore your world and beyond

HTC Desire HD is made for exploration. With built in GPS and awe-inspiring apps that keep track of everything from the stars in outer space to the route you took round the local park, there's no limit to what you can discover.
