

Product Information.

XNT measuring bit.

Part no. T0054486199.

Description.

An iron plated copper measuring bit for use with the WXP 65 soldering iron. The bit is used with a 0.5mm dia. jacketed type K thermocouple and a pyrometer to measure the actual tip temperature of the soldering iron. The thermal mass of the measuring bit closely matches that of the standard bit supplied with the WXP 65 iron.

Form.

Cylindrical with a socket to accept the thermpcouple.

Dimensions.

Approx 31mm long
