Temperature display: automatic

Temperature sensor: Yes

Pump power: Yes

Digital display of air flow: Yes

Pipette gripping components: 330 x 200 mm

Reference: V700043

Description: CIF 850 K

Reference: A1146.852

- Easy to handle
- Automatic cooling of the heating element
- Wide choice of available nozzles
- Compatible with HAKKO stations
- Wide range
- Autonomous

Range of 3 soldering / desoldering stations for SO, SOP, QFP, PLCC, PQFP components. Entirely ESD.

Those stations are different due to the presence of a digital display and a more accurate and constant temperature sensor (or the absence of those). Ergonomic and light iron (120 grams).

Every station of 850 serie is delivered with a simple nozzle diam. 2.5 mm (ref. A1124) and a set of pretension tools for components.
