BROADWAY by PCTV Systems is a new way to watch live TV on your iPhone®, iPad®, iPod Touch® or your Android® device – at home via Wi-Fi or around the world via the Internet.

BROADWAY by PCTV Systems is a brand new solution to stream live-TV to your Apple® iOS or android mobile device – at home and anywhere via the Internet.

Imagine, you watch your home TV program on your mobile device in a cafe in Paris or a hotel lobby in Las Vegas – in perfect quality. BROADWAY is a networked TV receiver with two integrated DVB-T tuners, an analog video input with IR blaster and support for the ultra-fast 802.11n wireless network standard.

BROADWAY brings your home DVB-T signal, your TV program from your cable- or satellite set-top box or live video from your analog camera wirelessly to mobile Apple iOS or Android devices or streams it throughout your home to any PC, regardless if it's Windows, Mac or Linux.

Get TV on your iOS® and Android® – instantly!

BROADWAY is a small stand alone device which connects to your TV antenna (or a cable or satellite set-top box) and sends live TV wirelessly to an Apple iPhone, iPad, iPod Touch, Android phone or tablet or a PC or Mac.

Live TV is transmitted by BROADWAY to your mobile device over your home Wi-Fi network or streamed over the Internet.

BROADWAY has two built-in high quality video converters that the TV signal and turn it into form which can be played on your mobile device. BROADWAY supports two transmission formats: one for Apple devices and one for devices which have Flash support.

BROADWAY contains two DVB-T receivers so you can watch live TV on any one mobile device plus a computer at the same time. Broadway is completely stand alone and "always on" with low power consumption.

On Apple devices, live TV from BROADWAY is watched with Safari, so you don't need to download an app. Simply open a Safari window, enter the Internet address of BROADWAY and you'll be watching live TV!

For Android devices, PCs or Macs, simply open any Internet browser with Flash support, enter the Internet address of BROADWAY and you'll be watching live TV! Now you have access to DVB-T everywhere at your home - even if you live in an area with weak DVB-T signal.

The set-up is as easy as 1-2-3:

1. Connect a DVB-T aerial or a cable or satellite set-top box to Broadway
2. Connect Broadway to your Wi-Fi router
3. Using Wi-Fi on your mobile device, PC or Mac, open a browser and type in http://distan.tv You can now fully control Broadway. Scan for TV channels and set up an Internet connection to Broadway

Watch live TV wirelessly on your computer or mobile device, in the home or around the world!

The BROADWAY networked TV receiver features two Freeview DVB-T tuners, hardware H.264 compression and support for the ultra-fast 802.11n wireless network (Wi-Fi) standard.

It connects to your home Wi-Fi router, converts the live TV signal to H.264 format and streams it wirelessly to mobile Apple devices as well as to any PC or Mac.

Stream live TV to your Mac or Windows PC

BROADWAY also supports PCs and Macs. Watch live TV on your computer using a web browser (Safari, Firefox, Chrome, Opera or Internet Explorer).

If you have a PC, you can also use the included TVCenter 6 to watch live TV, plus pause, rewind and schedule TV recordings.
