Security Light Switch

multicomp

Description:

A 24 hour/7 day digital security light switch which will automatically turn filament, fluorescent, low energy and low voltage lights ON & OFF at pre-programmed times. A total of 6 ON and 6 OFF independent switching commands can be set to operate over all 7 days (24 hour operation) or on individual days. An optional dusk start feature turns lights ON at dusk and OFF at a programmed time.

Features:

- Simple to programme and operate
- 6 ON/OFF switching programmes
- Three position slide switch allows manual operation, auto operation with timed ON and OFF or auto and photocell operation giving dusk start and timed OFF with additional timed ON
- In built 1000 hours rechargeable battery retains programmes and clock times during power failure
- Replaces any conventional single gang (ON/OFF & 2 way) light switch.
- Slim and tidy with concealed front panel
- Controls up to 300W of filament lighting
- Can also be used as a normal ON/OFF switch

Specifications:

Controller Output	: Digital
Time Range	: 24h / 7day
Battery Life (Working)	: 1,000h
Colour	: White
Contact Type	: ON/OFF
External Depth	: 50mm
External Length / Height	: 86mm
External Width	: 86mm
For Use With	: Low Energy, Fluorescent and Low Voltage Lighting
Output Type	: Digital
Switch type	: Single or Double Gang Single
Maximum lamp size	: 40W minimum up to maximum 300W
Light level sensing	: Yes
Light on time adjustable	: Yes
Concealed front panel	: Yes
Fluorescent and low energy lighting	: 20W or 25W low energy lamp 76W fluorescent 200W low voltage
Conforms to directives	: 73/23/EEC; 89/336/EEC

Note: Cannot be used with dimmer switches in two way switching system or replace an intermediate switch in three or more way switching system.

ZV700 is suitable for low energy, fluorescent and low voltage lighting.
