**Date:** 6/10/2013

**Subject:** UTG dust caps are superseded by UTO dust caps

**Product Part Number:** Products beginning with UTG and ending with DC or DCG (UTGXXDC and UTGXXDCG)

**Description of Change:** In order to rationalize and make our product offering easier to read and understand Souriau will keep only one metal dust cap. We will continue to accept orders of the UTGXXDCX till end of September 2013 and then will deplete its stock. After that date all UTGXXDCX orders will have to be converted in UTOXXDCX.

**Anticipated Impact on Form, Fit, or Function:**

The UTO dust cap guide keys are wider than UTG dust caps keys but sealing performances are preserved:

UTG

UTO

The UTO dust cap is then compatible with UTG receptacles.

Dust cap on UTG receptacle

Dust cap on UTO receptacle

**Implementation Date:** Immediate
