How does Norton Security protect you and your devices?
The PC on your desk, the smartphone in your hand, the tablet and Mac® in your bag. Yes, they're covered. Get rock-solid Norton protection for your PC, Mac, smartphone and tablet.
Your devices are different. So is the protection we provide for each one you use. Your PC and Mac are protected from online threats and identity theft. Your smartphone and tablet are safe from loss and unwanted access to your personal information.
Your privacy, your contacts, your messages. All safe and sound. Keep your private information on your devices safe so you can connect without worry.
Fits your growing and changing world. ¹ We make it easy to move protection from one device to another. So why wait? Get that new addition for your ever-changing collection of devices.
¹ Additional fee may be required. Pro-rata charges may apply if you require installation on more devices than allowed in your current product subscription.
But, I don't need antivirus on my smartphone or tablet...
Think of all the personal information you store on your mobile device—photos, contacts, messages—what would you do if your device was lost or stolen? Norton offers more than just antivirus so you get specialised protection for each device you use.
