MADE IN USA

KLEIN TOOLS 

For Professionals... Since 1857®

Cuts general purpose wire and cable

Custom coaxial cable cutting notch

Hot-riveted joint

Through-hardened custom US-made tool steel

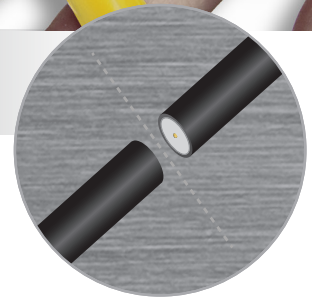

Coaxial Cable Cutter – CCS*

Designed to cut

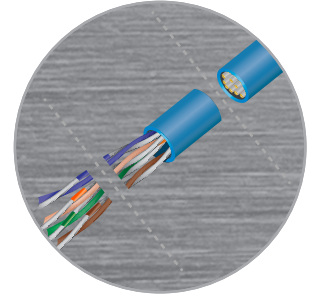

- copper-clad steel coaxial cable
- common wires or cables

Features

- Forged from custom, US-made steel and through-hardened, the specialized notched blade is designed to withstand cutting steel cable
- Notched blade section is optimized to easily cut common CCS coaxial cables such as RG-59, RG-6/6Q, RG-7 and RG-11
- Shears are designed to cleanly cut and snip solid and stranded copper, aluminum, UTP/STP twisted pair wires and cables
- Blade geometry ensures CCS coaxial cable retains form when cut to facilitate easy insertion into connectors and provide excellent terminations
- High-leverage handles for genuine one-handed operation
- Handles are plastic-coated for maximum comfort and grip

Cuts common CCS coaxial cables

Cuts solid and stranded copper and aluminum UTP/STP twisted pair
