Cat. 5E RJ45 Wall Outlet Module - 70402 Wiring Instructions

Please note: there are 2 wiring standards for networking T568A & T568B.
If adding to an existing network check the existing wiring to determine the standard used and wire accordingly.
If wiring a new network use T568B.

KEYSTONE JACK PIN NUMBERING	258A/*EIA-T568B*	*EIA-T568A*
1	White/Orange	White/Green
2	Orange	Green
3	White/Green	White/Orange
4	Blue	Blue
5	White/Blue	White/Blue
6	Green	Orange
7	White/Brown	White/Brown
8	Brown	Brown

1. Strip 75mm (3") of cable jacket, position first pair of wires according to colour code and insert wires . Remember to untwist each pair of wires only as much as is needed to make a strain free connection. Running wires along the central channel lets you preserve wire twisting as close to termination as possible.

2. Repeat Step 1 for each subsequent pair until all four pairs of wires are terminated. The module can now be snapped into a suitable faceplate.
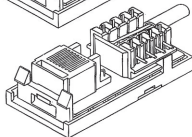

Step 1

Use impact/ punchdown tool to insert wires

Step 2
