

8 Zone Wireless Alarm System

With 2-Way SMS Messaging

**CONTROL ALARM
VIA SMS MSG**

**REPORTS VIA
SMS TEXT**

The Watchguard SMS 2010 is a true revolution in monitored home & mobile security systems. Designed specifically for simple installation and maximum protection at an affordable price, the WGSMS2010 can be used across a range of applications, including caravans, boats, building sites or anywhere where a portable, self-monitored alarm is required.

The Watchguard SMS 2010 communicates to your mobile via a GSM mobile phone network. A SIM Card enables 2-way communication via SMS text messaging between you and your alarm. The WGSMS2010 is also easy to install. After mounting the movement detectors in the zones to be monitored and mounting the external siren in a prominent position, simply plug the alarm module into the power pack (or connect 12VDC), turn the power key to on and you are ready to go.

How the System Works:

1) Arming the Premises

Use your Remote Control to arm the Watchguard Wireless Alarm System to secure your premises. The WGSMS2010 is ideal for home, office, marine and caravan/RV use.

When body movement is detected in the premises, the sensors will send a message to the alarm module.

2) Alarm Event / Signal Sent to Module

The alarm module or controller is the brain of the alarm system. When it receives the message from the Wireless Movement Sensors, it automatically sends your reported alarm to your designated mobile(s) as an SMS.

The internal siren will also sound, helping repel the intruder.

3) Detailed Alarm Notification

The alarm module communicates to your mobile phone via GSM. When triggered, the module sends a detailed SMS of the reported alarm to your designated mobile(s).

A voice message may also be sent to a landline telephone, where supported. Up to 5 people can be notified.

Package Contents

The WGSMS2010 is a 8 zone wireless security package. The kit includes:

1 x 8 Zone Alarm Controller Unit with Built-in Quad Band GSM Modem

2 x Two Button Code Hopping Remote Controls

2 x Wireless Supervised Passive Infrared Detectors

- Dual edge sensing to prevent false alarms
- 12m motion detection arc
- Alarm, tamper, supervision and low battery warnings
- Swivel bracket for easy mounting and adjustment

1 x 12V DC Power Supply for Controller Unit

1 x Compact External Siren and Strobe

4 x High Visibility, UV Resistant Warning Stickers

4 Year Warranty

Additional Accessories

Easily expand your system with door/window security, fire detection and emergency response

Wireless Reed Switch
Model: WREEDI

- Protect doors/windows
- CR2450 lithium batteries

Panic/Emergency Pendant
Model: WPNIC

- Large, easy-push button
- Splashproof, incl. lanyard

Wireless Mini Keypad
Model: WKP

- For arm/disarm/panic
- Code hopping technology

Wireless Smoke Detector
Model: SMOETW

- Gas ionisation technology
- Built-in piezo siren
