Features and Benefits	• Outside serrations minimize damage to cables, while still providing high tensile strength and low insertion force. • Contour style head design provides additional space in constrained areas. • Heat stabilized material provides excellent resistance to high heat exposures.
Product Description	HellermannTyton outside serrated cable ties are designed with a smooth inside surface to help minimize indentation or damage to wire and cable insulation, while offering high tensile strength and low insertion force. The contour style head takes up less space than traditional style cable ties making it ideal for space constrained areas. For high volume applications, tensioning tools are available to ensure consistent and safe installation.
