Modular Data Plug Termination Kit

Overview

This is a technician-friendly kit for making on-the-spot data plug terminations in the field.

The kit includes a Deluxe Modular Plug Termination Tool that crimps CAT5e and CAT6 modular plug connectors. It also acts as a cable cutter and cable jacket stripper. Its smooth ratchet gives you full connector termination, and the cushioned grip and spring-actuated handles make the tool easy to hold. Use the ratchet release to disengage the ratchet during faulty terminations.

Features

- Includes everything you need to cut, strip, and terminate CAT5e and CAT6 cable and connectors.
- Loading bars for the CAT6 plugs maintain ½" twist prior to termination, so it's easy to use.
- Compact, hard plastic case keeps everything in its place.
- Guaranteed for life!
