Catalog Description:	CC-U/STD Universal signal converter 24-48VDC / 24VAC 50/60Hz
Long Description:	The CC-U/STD is a standard analog signal converter from the CC-U range. This converter, with 3-way electrical isolation, operates with a rated control supply voltage of 24-48 V DC. It provides short-circuit proof signal outputs, pluggable connecting terminals and configurable detection of input voltage signal interruption (low fail safe / high fail safe). 28 input signal ranges (16 standard and 12 non-standard) and 41 output signal ranges (8 standard and 33 non-standard) can be configured by means of directly accessible lateral DIP switches. The gain and the offset adjustment is made via front-face operating elements. Applied supply voltage is displayed by a green LED.
