

USB-C to 4K HDMI Multifunction Adapter with Power Delivery and USB-A Port - White

Product ID: CDP2HDUACPW

This universal multifunction adapter lets you expand the connectivity of your laptop or MacBook through USB-C™. You can connect your laptop to a 4K HDMI® display, while also connecting a traditional USB 3.0 device. And, when coupled with your laptop's power adapter, the multiport adapter delivers power to help charge and maintain your laptop's battery.

Rugged, travel-friendly design

This compact USB-C adapter is a vital accessory for your MacBook, Chromebook™, or any USB-C equipped laptop. It's extremely portable, with a lightweight, small-footprint design that tucks neatly into your laptop bag or carrying case.

The rugged multifunction adapter meets the tough demands of travelers. Now you can rest assured knowing your adapter is ready when you are.

Supports 4K Ultra HD

If you have a 4K HDMI display, you can connect it to this combo adapter to create a dual-monitor workstation (laptop display + external display). With an additional display, you can get more work done at once by multitasking more efficiently. Plus, 4K resolution lets you enjoy astonishing picture quality, with rich and vivid realism.

Whether you're delivering a presentation in a boardroom or looking to add a display to your existing laptop workstation, this adapter is a must-have accessory.

Charges your laptop

Because this versatile adapter supports USB Power Delivery, you can power and charge your laptop through its USB Type-C™ port. Simply connect the adapter to your laptop's USB-C port, and then connect your laptop's power adapter to the multifunction adapter.

By using a single power adapter to power your laptop and the adapter, instead of using multiple adapters, you can travel lighter and more conveniently. Plus, you can reduce cable clutter in your work area.

Universally supported

Unlike some proprietary laptop adapters designed only to work with specific laptop models, this universal adapter works with multiple brands. All you need is a laptop's USB-C port that supports DP alt mode and USB Power Delivery, and you can be up and running quickly. With universal support, you can use this adapter with different laptops now, or in the future. Plus, it's compatible with Thunderbolt™ 3 ports.

Works with older USB devices

This USB-C multifunction adapter features a USB 3.0 port that's backward compatible with older USB devices. It's perfect for data transfers, syncing, or charging your mobile device.

The CDP2H DUACPW is backed by a StarTech.com 3-year warranty and free lifetime technical support.

Certifications, Reports and Compatibility

Applications

- Carry the adapter with you when you travel, and connect to almost any HDMI monitor, TV, or projector
- Ideal for BYOD (Bring Your Own Device) and CYOD (Choose Your Own Device) applications in the office
- An essential accessory for the latest USB-C equipped laptops, such as the MacBook, Dell XPS™ 15, 13, or 12, Dell Latitude™ laptops and 2-in-1s, HP Chromebook™ 13, Google Chromebook, as well as USB-C equipped Windows® based tablets
- Power and charge your USB Type-C equipped laptop through the adapter, using your laptop's power adapter

Features

- Universal adapter that adds a 4K HDMI display (3840 x 2160p - 30Hz) and a USB-A port to your laptop, through USB-C
- Can be used with your laptop power adapter to power and charge your laptop, with support for USB Power Delivery
- Rugged housing design for durability, lightweight and compact for portability and convenience
- Built-in USB Type-C cable with a reversible connector for hassle-free insertions
- Universal, works with virtually any USB-C equipped laptop, MacBook, or Chromebook
- USB 3.0 (USB Type-A) port is backward compatible, and it supplies power even when the adapter is disconnected from the host (a power adapter must be connected to the multifunction adapter)
- Supports USB-C DP alt mode, and is Thunderbolt 3 port compatible

Hardware	Warranty	3 Years

	Special Notes / Requirements	Note	Not all USB-C ports support the full functionality of the USB Type-C standard. Ensure that your host USB-C port supports USB Power Delivery 2.0 and DP alt mode. The adapter can connect to a host laptop's USB-C port that doesn't support USB Power Delivery 2.0. However, in this configuration if a power adapter is connected to the multifunction adapter, it will not pass power through to your host laptop. A 4K-capable display is required to achieve 3840 x 2160p resolution (4K is also known as 4K x 2K) USB 3.0 is also known as USB 3.1 Gen 1; this connectivity standard offers speeds up to 5Gbps.
		System and Cable Requirements	A host laptop with an available USB-C port (to ensure full adapter functionality, the host USB-C port must support USB Power Delivery 2.0 and DP alt mode). Optional: USB-C power adapter (for example, your laptop's USB-C based power adapter).
		Power	Power Source
