## TRIMMING POTENTIOMETERS

October, 2017

## Bourns® Model 3269 12-Turn Trimpot® Trimming Potentiometers Update to Plastic Housing Material

In support of RoHS initiatives and to help address environmental issues faced by our customers, Bourns is pleased to announce that it will be updating the plastic housing material used on our [Model 3269](#) Trimpot® Trimming Potentiometers to Victrex PEEK. PEEK, a resin material, is RoHS\* and REACH compliant. Bourns has used PEEK resin material for many years, as it is already the source for the plastic housing on the Bourns® Model 3224 SMT Trimpot® Trimming Potentiometer. The Model 3269 will continue to be manufactured in Costa Rica.

The product's form, fit, function, quality and reliability will not be affected by this change. The only change is to the product's plastic housing material.

Implementation dates are as follows:

*Date that deliveries of products packaged in the modified plastic housing material will begin: **April 18, 2018***

*First date code using the above changes: **815C0***

If you have any questions or need additional information, please feel free to contact your local [Customer Service/ Inside Sales](#) representative.
