

## Mighty Cam Auto Focus with Macro Lens and ZEN Mount

32 GB SD Card	High Magnification	HDMI Output	Extended Reach
Image Capture	6x-18x* 32x-52x*	1080p Resolution	12in-16in

Monitor included!

### Designed for Versatility

This system utilizes a macro zoom lens, providing **6x-18x magnification** at a 6in working distance/32x-52x at a 1cm working distance, based on a 24in monitor. View 1080p HD images without the inconvenience of having to constantly re-adjust the lens focus. The Mighty Cam Auto Focus is ideal for inspecting objects with multiple focus points such as PCBs and other layered objects. The ZEN Mount is a stable and highly versatile lightweight, multi-angle, telescoping mount that offers optimal maneuverability. The ball joint at the base of the mount provides limitless positioning options. A second ball joint at the top of the stand fastens to the Mighty Cam Auto Focus Camera, and can also be angled to virtually any position. The ZEN Mount (now available at [Aventools.com](http://Aventools.com)) features a telescoping arm, with an extended reach of 12in-16in. This system comes complete with a 22in LCD Monitor and imaging/measurement software.
