Customer: Newark Electronics

Subject: TE Connectivity PN:2299287-1&2299287-2 POD-LOK 187 FLAG Alert

Dear TE Connectivity (TE) Customer:

This communication is to alert TE customers of a planned modification to the design of POD-LOK terminals, PN`s 2299287-1 and 2299287-2. The terminals will be modified to improve applicator consistency for housing insertion performance. This modification is required for use with a TE applicator. While a change notice will be distributed separately, TE will accept return of unapplied product at this time. Product already applied is unaffected, and if you have local applicator which can crimp properly per TE application specification 114-106262, no action is required.

Please contact TE Customer Care to arrange product return and replacement. The affected PNs and deliveries shipped to you are listed as below. Please contact your Customer Care representative by 6/5/2019 to confirm your receipt of this letter.
