

# SAFETY DATA SHEET Heat Transfer Compound - Zinc Oxide Free

According to Regulation (EC) No 1907/2006, Annex II, as amended.

| SECTION 1: Identification of   | the substance/mixture and of the company/undertaking  |
|--|---|
| 1.1. Product identifier  |   |
| Product name   | Heat Transfer Compound - Zinc Oxide Free  |
| Product number   | HTCX_ZF, EHTCX_ZF10S, ZE  |
| 1.2. Relevant identified uses of the substance or mixture and uses advised against |   |
| Identified uses  | Heat Dissipation  |
| Uses advised against   | No specific uses advised against are identified.  |
| 1.3. Details of the supplier of  | the safety data sheet   |
| Supplier   | ELECTROLUBE. A division of HK WENTWORTH LTD<br>ASHBY PARK, COALFIELD WAY,<br>ASHBY DE LA ZOUCH, LEICESTERSHIRE LE65 1JR<br>UNITED KINGDOM<br>+44 (0)1530 419600<br>+44 (0)1530 416640<br>info@hkw.co.uk |
| 1.4. Emergency telephone number  |   |
| Emergency telephone  | +44 1865 407333   |
| SECTION 2: Hazards identified  | cation  |
| 2.1. Classification of the subs  | stance or mixture   |
| Classification (EC 1272/2008   |   |
| Physical hazards   | Not Classified  |
| Health hazards   | Not Classified  |
| Environmental hazards  | Not Classified  |
| 2.2. Label elements  |   |
| Hazard statements  | NC Not Classified   |
| 2.3. Other hazards   |   |
| This product does not contain any substances classified as PBT or vPvB.            |   |
| SECTION 3: Composition/information on ingredients                                  |   |

### 3.2. Mixtures

| CAS number: 1344-28-1       REACH registration number: 01-2119529248-35-XXXX         Classification       Not Classified         The full text for all hazard statements is displayed in Section 16.         SECTION 4: First aid measures         4.1. Description of first aid measures         General information       Get medical attention if any discomfort continues. Show personnel.         Inhalation       Move affected person to fresh air and keep warm and a breathing. Maintain an open airway. Loosen tight clothing or milk to drink. Stop if the affected person feels sick as induce vomiting unless under the direction of medical person distributes with desense of the direction of medical person distributes with distributes with does not enter the lung unconscious person. Maintain an open airway. Loosen distributes with water.         Skin contact       Remove affected person from source of contamination. water. |   |
|---|---|
| Not Classified         The full text for all hazard statements is displayed in Section 16.         SECTION 4: First aid measures         4.1. Description of first aid measures         General information       Get medical attention if any discomfort continues. Show personnel.         Inhalation       Move affected person to fresh air and keep warm and a breathing. Maintain an open airway. Loosen tight clothing.         Ingestion       Rinse mouth thoroughly with water. Remove any dentur or milk to drink. Stop if the affected person feels sick as induce vomiting unless under the direction of medical personul be kept low so that vomit does not enter the lung unconscious person. Maintain an open airway. Loosen tight clother the lung unconscious person. Maintain an open airway. Loosen the lung unconscious person from source of contamination.         Skin contact       Remove affected person from source of contamination.   |   |
| SECTION 4: First aid measures         4.1. Description of first aid measures         General information       Get medical attention if any discomfort continues. Show personnel.         Inhalation       Move affected person to fresh air and keep warm and a breathing. Maintain an open airway. Loosen tight clothin         Ingestion       Rinse mouth thoroughly with water. Remove any dentur or milk to drink. Stop if the affected person feels sick as induce vomiting unless under the direction of medical person description         Skin contact       Remove affected person from source of contamination.   |   |
| 4.1. Description of first aid measures         General information       Get medical attention if any discomfort continues. Show personnel.         Inhalation       Move affected person to fresh air and keep warm and a breathing. Maintain an open airway. Loosen tight clothin         Ingestion       Rinse mouth thoroughly with water. Remove any dentur or milk to drink. Stop if the affected person feels sick as induce vomiting unless under the direction of medical personul be kept low so that vomit does not enter the lung unconscious person. Maintain an open airway. Loosen f         Skin contact       Remove affected person from source of contamination.   |   |

|   | Rinse immediately with plenty of  |
| Eye contactRinse immediately with plenty of water. Remove any co<br>apart. Continue to rinse for at least 10 minutes.   | ntact lenses and open eyelids wide  |
| Protection of first aiders First aid personnel should wear appropriate protective e   | equipment during any rescue.  |
| 4.2. Most important symptoms and effects, both acute and delayed  |   |
| General informationSee Section 11 for additional information on health haze<br>described will vary dependent on the concentration and   |   |
| Inhalation Prolonged inhalation of high concentrations may damage   | je respiratory system.  |
| Ingestion Gastrointestinal symptoms, including upset stomach. Fu<br>be inhaled, resulting in the same symptoms as inhalatio   | -   |
| Skin contact Prolonged contact may cause dryness of the skin.   |   |

**Eye contact** May cause temporary eye irritation.

4.3. Indication of any immediate medical attention and special treatment needed

Notes for the doctor Treat symptomatically.

Specific treatments No special treatment required.

# SECTION 5: Firefighting measures

#### 5.1. Extinguishing media

| Suitable extinguishing media   | The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire. |
|--------------------------------|--|
| Unsuitable extinguishing media | Do not use water jet as an extinguisher, as this will spread the fire.   |

5.2. Special hazards arising from the substance or mixture

| Specific hazards                                 | Containers can burst violently or explode when heated, due to excessive pressure build-up.  |
|--|---|
| Hazardous combustion<br>products                 | Thermal decomposition or combustion products may include the following substances:<br>Harmful gases or vapours.   |
| 5.3. Advice for firefighters                     |   |
| Protective actions during firefighting           | Avoid breathing fire gases or vapours. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak. |
| Special protective equipment<br>for firefighters | Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.  |

#### SECTION 6: Accidental release measures

#### 6.1. Personal precautions, protective equipment and emergency procedures

Personal precautionsNo action shall be taken without appropriate training or involving any personal risk. Keep<br/>unnecessary and unprotected personnel away from the spillage. Wear protective clothing as<br/>described in Section 8 of this safety data sheet. Follow precautions for safe handling<br/>described in this safety data sheet. Wash thoroughly after dealing with a spillage.

#### 6.2. Environmental precautions

**Environmental precautions** Avoid discharge to the aquatic environment. Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).

#### 6.3. Methods and material for containment and cleaning up

Methods for cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Reuse or recycle products wherever possible. Approach the spillage from upwind. Small Spillages: If the product is soluble in water, dilute the spillage with water and mop it up. Alternatively, or if it is not water-soluble, absorb the spillage with an inert, dry material and place it in a suitable waste disposal container. Large Spillages: If leakage cannot be stopped, evacuate area. Flush spilled material into an effluent treatment plant, or proceed as follows. Contain and absorb spillage with sand, earth or other non-combustible material. Place waste in labelled, sealed containers. Clean contaminated objects and areas thoroughly, observing environmental regulations. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.

#### 6.4. Reference to other sections

#### SECTION 7: Handling and storage

#### 7.1. Precautions for safe handling

| Usage precautions                         | Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimise spills. Keep container tightly sealed when not in use. Avoid the formation of mists. |
|---|---|
| Advice on general<br>occupational hygiene | Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.                 |

# 7.2. Conditions for safe storage, including any incompatibilities Storage precautions Store in accordance with local regulations. Storage class Unspecified storage. 7.3. Specific end use(s) The identified uses for this product are detailed in Section 1.2. SECTION 8: Exposure Control parameters Personal protection 8.1. Control parameters Cocupational exposure limits Aluminium Oxide Here in the initial control parameters

Long-term exposure limit (8-hour TWA): WEL 4 mg/m<sup>3</sup> respirable dust Long-term exposure limit (8-hour TWA): WEL 10 mg/m<sup>3</sup> inhalable dust

#### Maleic Anhydride

Long-term exposure limit (8-hour TWA): WEL 1 mg/m<sup>3</sup> Short-term exposure limit (15-minute): WEL 3 mg/m<sup>3</sup> Sen

#### **Diboron Trioxide**

Long-term exposure limit (8-hour TWA): WEL 10 mg/m<sup>3</sup> Short-term exposure limit (15-minute): WEL 20 mg/m<sup>3</sup> WEL = Workplace Exposure Limit Sen = Capable of causing occupational asthma.

# 8.2. Exposure controls Protective equipment

### Appropriate engineering Provide adequate ventilation. Good general ventilation should be adequate to control worker exposure to airborne contaminants. controls Eye/face protection Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. The following protection should be worn: Chemical splash goggles. Hand protection Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with European Standard EN374. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended. Other skin and body Appropriate footwear and additional protective clothing complying with an approved standard protection should be worn if a risk assessment indicates skin contamination is possible. Hygiene measures Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When

using do not eat, drink or smoke.

| Respiratory protection          | Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Provide adequate ventilation. Large Spillages: If ventilation is inadequate, suitable respiratory protection must be worn. |
|---------------------------------|---|
| Environmental exposure controls | Not regarded as dangerous for the environment.  |

# SECTION 9: Physical and Chemical Properties

# 9.1. Information on basic physical and chemical properties

| Appearance                                      | Paste.  |
|---|---|
| Colour  | Grey.   |
| Odour   | Not known.  |
| Odour threshold                                 | Not available.  |
| рН  | Not available.  |
| Melting point                                   | Not available.  |
| Initial boiling point and range                 | Not available.  |
| Flash point                                     | Not available.  |
| Evaporation rate                                | Not available.  |
| Evaporation factor                              | Not available.  |
| Flammability (solid, gas)                       | Not available.  |
| Upper/lower flammability or<br>explosive limits | Not available.  |
| Other flammability                              | Not available.  |
| Vapour pressure                                 | Not available.  |
| Vapour density                                  | Not available.  |
| Relative density                                | 2.28 @ 20°C   |
| Bulk density                                    | Not available.  |
| Solubility(ies)                                 | Not available.  |
| Partition coefficient                           | Not available.  |
| Auto-ignition temperature                       | Not available.  |
| Decomposition Temperature                       | Not available.  |
| Viscosity                                       | 85-95 Pa s @ 25°C   |
| Explosive properties                            | Not considered to be explosive.                                     |
| Oxidising properties                            | Does not meet the criteria for classification as oxidising.         |
| 9.2. Other information                          |   |
| SECTION 10: Stability and rea                   | activity  |
| 10.1. Reactivity                                |   |
| Reactivity                                      | There are no known reactivity hazards associated with this product. |

10.2. Chemical stability

| Stability  | Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.  |
|--|--|
| 10.3. Possibility of hazardous                                 | reactions  |
| Possibility of hazardous reactions                             | No potentially hazardous reactions known.  |
| 10.4. Conditions to avoid                                      |  |
| Conditions to avoid  | There are no known conditions that are likely to result in a hazardous situation.  |
| 10.5. Incompatible materials                                   |  |
| Materials to avoid   | No specific material or group of materials is likely to react with the product to produce a hazardous situation.   |
| 10.6. Hazardous decompositio                                   | on products  |
| Hazardous decomposition products                               | Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours. |
| SECTION 11: Toxicological int                                  | formation  |
| 11.1. Information on toxicologi                                | cal effects  |
| Toxicological effects  | Not regarded as a health hazard under current legislation.   |
| Acute toxicity - oral<br>Notes (oral LD₅₀)                     | Based on available data the classification criteria are not met.   |
| Acute toxicity - dermal  |  |
| Notes (dermal LD₅₀)  | Based on available data the classification criteria are not met.   |
| Acute toxicity - inhalation<br>Notes (inhalation $LC_{50}$ )   | Based on available data the classification criteria are not met.   |
| Skin corrosion/irritation<br>Animal data                       | Based on available data the classification criteria are not met.   |
| Serious eye damage/irritation<br>Serious eye damage/irritation | Based on available data the classification criteria are not met.   |
| Respiratory sensitisation<br>Respiratory sensitisation         | Based on available data the classification criteria are not met.   |
| Skin sensitisation<br>Skin sensitisation                       | Based on available data the classification criteria are not met.   |

Other adverse effects None known.

# SECTION 13: Disposal considerations

| 13.1. Waste treatment method   | <u>S</u>  |  |
|--|---|--|
| General information  | The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. |  |
| Disposal methods   | Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste packaging should be collected for reuse or recycling. Incineration or landfill should only be considered when recycling is not feasible. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of the local water authority.                          |  |
| SECTION 14: Transport inform   | nation  |  |
| General  | The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).  |  |
| 14.1. UN number  |   |  |
| Not applicable.  |   |  |
| 14.2. UN proper shipping name  | <u>e</u>  |  |
| Not applicable.  |   |  |
| 14.3. Transport hazard class(es)   |   |  |
| No transport warning sign requ   | lired.  |  |
| 14.4. Packing group  |   |  |
| Not applicable.  |   |  |
| 14.5. Environmental hazards  |   |  |
| Environmentally hazardous substance/marine pollutant<br>No.                                    |   |  |
| 14.6. Special precautions for user   |   |  |
| Not applicable.  |   |  |
| 14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code                       |   |  |
| Transport in bulk according to Not applicable.<br>Annex II of MARPOL 73/78<br>and the IBC Code |   |  |
| SECTION 15: Regulatory infor   | mation  |  |

# 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

| National regulations | Health and Safety at Work etc. Act 1974 (as amended).<br>The Chemicals (Hazard Information and Packaging for Supply) Regulations 2009 (SI 2009 |
|----------------------|--|
|                      | No. 716).  |
