

DESCRIPTION

The TBMA is a test board for the MagAlpha magnetic position sensor family. The TBMA allows users to run and test MagAlpha sensors quickly. TBMA boards come in two different formats: round (RD) and long (LT). In the RD format, the sensor is mounted in an end-of-shaft configuration. In the LT format, the sensor is mounted on the edge of the board and can be used in both side-shaft and end-of-shaft configurations.

The TBMA is compatible with the Macom kit, offering seamless connection and operation of the MagAlpha and allowing users to evaluate MagAlpha functionalities and performances with their own set-up.

Contrary to the EVMA, the TBMA test board only includes the assembled board with the sensor and decoupling capacitors. It does not include connectors.

FEATURES

- Round Board Format for End-of-Shaft Mounting
- Long Board Format for Side Shaft and End-of-Shaft Mounting
- Compatible with MagAlpha Communication Interface Kit (EVKT-MACOM)

APPLICATIONS

- Servo Drives
- Robotics
- Automotive
- BLDC Motor Commutation
- Encoders

All MPS parts are lead-free, halogen-free, and adhere to the RoHS directive. For MPS green status, please visit the MPS website under Quality Assurance. "MPS" and "The Future of Analog IC Technology" are registered trademarks of Monolithic Power Systems, Inc.

OVERVIEW

Round (RD)

Long (LT)

Figure 1: TBMA

BOARD TYPE

Different board types are available, and each has a different schematic and layout design (see Table 1). The board type to use is determined by the selected sensor part number.

Each board type is also available in two different formats: a round shape test board (RD), or a long shape test board (LT). The board part number specifies which format is used:

- TBMAXXX-Q-RD-XXX = round shape test board
- TBMAXXX-Q-LT-XXX = long shape test board

Both RD and LT board formats can be used for end-of-shaft configurations where the sensor is positioned at the end of the motor or knob shaft. For side-shaft configurations where the sensor is positioned perpendicularly to the motor or knob shaft, only the RD board format can be used.

Table 1: Board Type

Board Type	Board Part Number	MPS Chip Part Number

Connector Pinout

Figure 10 shows the connector pinout of the Type 1 round board. Figure 11 shows the connector pinout for the Type 1 long board.

Figure 10: Connector RD Pinout Type 1

Figure 11: Connector LT Pinout Type 1

See Table 3 for Type 1 pin registers.

Table 3: Connector Pin Mapping Type 1

Pin	Name	Description
CN1.1	VDD	3.3V supply.
CN1.2	GND	Ground.
CN1.3	VFLASH	Flash power supply (3.9V only powered during flashing).
CN1.4	CS	Chip select (serial).
CN1.5	SCLK	Clock (serial).
CN1.6	MISO	Master in slave out (serial).
CN1.7	MOSI	Master out slave in (serial).
CN1.8	-	Leave unconnected.
CN2.1	U ⁽¹⁾	U output (optional motor commutation).
CN2.2	V ⁽¹⁾	V output (optional motor commutation).
CN2.3	W ⁽¹⁾	W output (optional motor commutation).
CN2.4	A ⁽¹⁾	A output (optional incremental encoder).
CN2.5	B ⁽¹⁾	B output (optional incremental encoder).
CN2.6	Z ⁽¹⁾	Z output (optional incremental encoder).
CN2.7	TEST	Test pin.
CN2.8	PWM ⁽¹⁾	Pulse width modulation output (optional).

NOTE:

1) Availability of this option depends of the chip part ID. Please refer to the part datasheet directly.

BOARD TYPE 2

RD Format Overview

See Table 5 for Type 2 pin registers.

Table 5: Connector Pin Mapping Type 2

Pin	Name	Description
CN1.1	VDD	3.3V supply.
CN1.2	GND	Ground.
CN1.3	-	-
CN1.4	CS	Chip select (serial).
CN1.5	SCLK	Clock (serial).
CN1.6	MISO	Master in slave out (serial).
CN1.7	MOSI	Master out slave in (serial).
CN1.8	TEST	Test pin.
CN2.1	IO6 ⁽²⁾	Pin 15 (IO).
CN2.2	IO1 ⁽²⁾	Pin 1 (IO).
CN2.3	IO5 ⁽²⁾	Pin 9 (IO).
CN2.4	IO4 ⁽²⁾	Pin 6 (IO).
CN2.5	IO2 ⁽²⁾	Pin 2 (IO).
CN2.6	IO3 ⁽²⁾	Pin 3 (IO).
CN2.7	MGL ⁽³⁾	Magnetic level low (optional).
CN2.8	MGH ⁽³⁾	Magnetic level high (optional).

NOTES:

- 2) Please, refer directly to the chip datasheet to know which features are available on these pins.
- 3) Availability of this option depends of the chip part ID. Please refer to the part datasheet directly.

MAGNET SUPPLIERS

Table 6 shows a non-exhaustive list of possible magnet suppliers. The magnetization direction must be chosen wisely given the fact that most sold magnets are often axially magnetized, which is not a magnetization direction usually required in magnetic angle sensing applications. Angle sensing applications typically use diametrically magnetized magnets.

Table 6: Magnet Suppliers

Maurer Magnetic

Maurer Magnetic has a selection of diametrically magnetized magnets well-suited for contactless rotary angle applications (see Figure 21 and Figure 22). Samples of the types mentioned below should always be available with no lead time.

Figure 21: Cylinder Magnet, Diametrically Magnetized

Figure 22: Ring Magnet, Diametrically Magnetized

See Table 7 for a list of Maurer Magnetic magnets.

Table 7: Maurer Magnetic Diametrically Magnetized Magnets

OD (mm)	ID (mm)	H (mm)	Material	Remanence (Br) (T)	Magnetization	Part Number
