Notes

For additional Technical Data EASY5... and EASY7... \rightarrow AWB2528–1508GB,

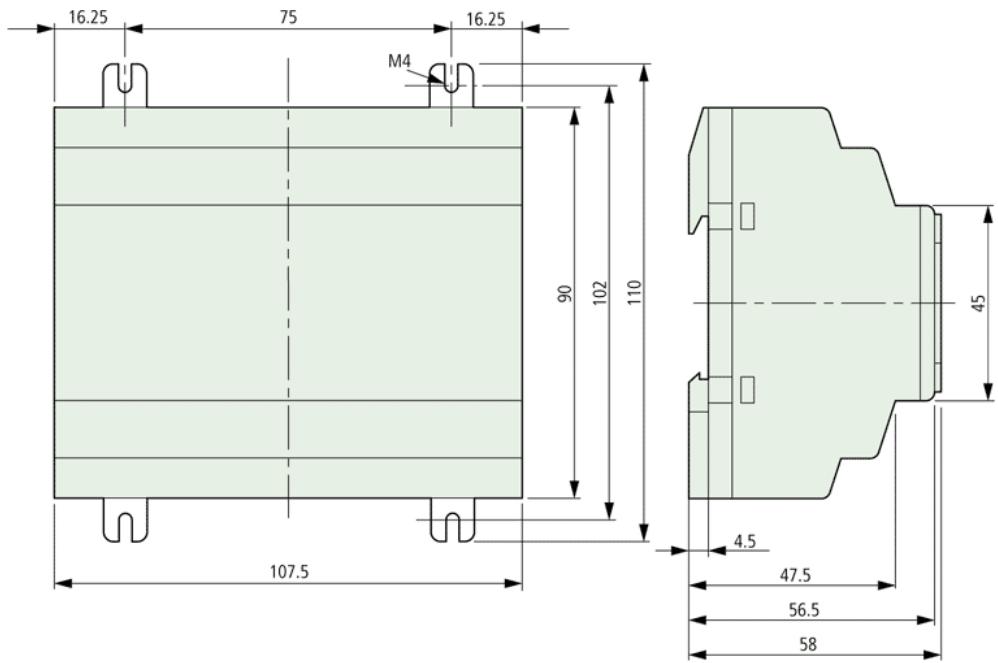

EASY8... \rightarrow AWB2528–1423D

Notes

For inductive loading, without external suppression of the transistor outputs, the following applies:
 $T_{0.95} = \text{time in ms, until 95 \% of the steady-state current is achieved. } T_{0.95} \approx 3 \times T_{0.65} = 3 \times L/R.$

Data transfer rate in the NET network: bus lengths of 40 m and over only attainable with cables with additional cross-section and connection adapter.
