<b>Notes</b>				
The reversing starter (complete unit) consists of a PKZM0 motor-protective circuit-breaker and two DILM contactors.				
With the adapter-less top-hat rail mounting of starters up to 12 A, only the motor-protective circuit-breaker on the top-hat rail requires an adapter. The contactors are provided with mechanical support via a mechanical connection element.				
Control wire guide with max. 6 conductors up to 2.5mm external diameter or 4 conductors up to 3.5mm external diameter.				
From 16 A, the motor-protective circuit-breakers and contactors are mounted on the top-hat rail adapter plate.				
The connection of the main circuit between PKZ and contactor is established with electrical contact modules.				
Complete units with mechanical interlock, starters up to 12 A also feature electrical interlock.				
When using the auxiliary contacts DILA-XHIT... (→ 101042) the plug-in electrical connector can be removed without the removal of the front mounting auxiliary contact.
