4-Port Cable/DSL Gateway Router

Part # F5D5230u4

Ideal for sharing a broadband Internet connection with multiple users as well as building your 10/100 Base-T Ethernet network, the Router connects to your Cable or DSL modem and your computers. It sets up easily using the breakthrough Belkin SOHO Networking software, so you can begin sharing Internet access, files, printers, drives and more. The Router also provides NAT firewall security from the Internet, which locks would-be hackers from your home or office network.

The Belkin 4-Port Cable/DSL Gateway Router is compliant with the Ethernet 802.3 and 802.3u standards and is the best solution for sharing a broadband Internet connection with multiple users. It allows you to build your 10/100 Base-T Ethernet network for sharing files and peripherals such as hard drives, printers, CD-ROMs, DVDs and more. With its added NAT firewall, the Router protects your network from outside intrusions.

Advantages :
• Compliant with Ethernet IEEE 802.3 and 802.3u standards
• Quickly and easily configure your network using Belkin SOHO Networking Software
• Add-on other Belkin networking products using the unique docking ring
• Minimize desk clutter and add an innovative vertical design as you link
• Belkin Lifetime Warranty and free technical support

Features
• Enables you to share your broadband Internet connection
• Lets you exchange data quickly between connected PCs and notebooks, share printers
and other peripherals, and communicate via e-mail
• Auto-sensing to offer future scalability of 10Base-T networks into 100Base-T Networks
• Uplink port that lets you add computers to your network
• Dedicated bandwidth for each port so you can enjoy an efficient and error-free network
• LED indicators for monitoring network traffic
• Plug-and-Play compatibility
• **Package Includes**
One 4-Port Cable/DSL Gateway Router
One Power Supply
One CD-Rom
One User Guide
• Compatible with Windows® 98, Windows® 2000, Windows® Me, Windows® XP and
Mac OS up to Mac OS X and AppleTalk.
