

Features:

- 30W Single Output - Regulated
- Output Range: 5V - 24VDC
- Input: 90 - 264VAC , 47 - 63Hz
- Low Standby Power
- Fully Isolated Pri - Sec 3000Vrms
- 100% Full Burn-in Test
- LED Indicator DC On, DC Low

Part Number	Power Rating Watts	Output Voltage (Vdc)	Output Current (mA)	Ambient Temp. (°C)	Efficiency Typical	Input Range
VTX-211-030-105	25	5	5000	70	>80%	90 - 264VAC
VTX-211-030-112	30	12	2500			
VTX-211-030-115	30	15	2000			
VTX-211-030-124	30	24	1300			
Note: Other output voltages are available upon request.						

Application:

- Process Control
- Factory Automation
- Traffic & Transportation System
- Industrial Applications

LED(Green)
DC OK LED light will be ON when the power supply is properly operated

LED(Red)
DC Low LED light will be ON:
(1) when output voltage is below 85%(±2.5%) from the rated output voltage;
(2) when get over voltage, over current, over temperature and short circuit fault

Application Note: Series Connection

Note:

1. Series operation can be connected as shown in above;
2. Load current should be less than the current value of the product with the lowest output current specified at the product specification with the power supply at series connection.

Application Note: Parallel Connection

Note:

1. Parallel operation should be composed with the same products, while the connection should be as shown as "Parallel operation C";
2. In parallel operation C, current capacity cannot be increased, while it should be used for backup only. Moreover, diode that is to be added during parallel operation should be selected after considering it's voltage drop, output voltage and current capacity.

Please contact Vigortronix for any enquiries. Products can be altered to suit custom requirements. The information contained in this document is subject to change without notice.

Application Note: Mounting

Mounting method should be considered with airflow. Leave enough space between the units when several units are mounted together. Forced air cooling makes protection against heat better.

Application Note: Fitting

Firstly hang A part on the top of Rail as shown in below, then push the power supply into B direction to fix it.

Application Note: Removing

Remove the power supply to D direction, pulling C part by using tools, such as a screwdriver, to downward direction.
