

GP Primary Lithium Pro- CR123A

Part number: GPPCL123A117

Pack of 1

DESCRIPTION

GP Lithium batteries are able to quickly provide a high outputs, ideal for today's most modern Smart home devices, flashlights, photo flashes and cameras. This sophisticated technology allows a shelf life of 10 years and delivers excellent performance even under extreme temperature conditions.

Features:

- Up to 40% longer lasting
- Excellent performance for everyday devices (e.g. motion sensor, smart door lock, camera, flashlight)
- Excellent performance for critical, security and life protection devices (e.g. wireless IP camera, smoke detector, medical equipment, AED survival kit)
- Best in class, constant discharge profile even under extremely low temperatures. Avoids sudden voltage drop causing unpredictable device failure in severe climate.
- Reliable even in a wide range of operating temperatures (-40°C to +60°C)
- Built-in safety mechanism
- 10 years shelf life

Specifications:

- Size: CR123A
- Voltage: 3V
