S32K3X4EVB-Q172: Evaluation and Development Board for General Purpose

FOLLOW  

Overview

The S32K3X4EVB-Q172 is an evaluation and development board for general purpose automotive applications.

Based on the 32-bit Arm® Cortex®-M7 S32K3 MCU in a 172 MaxQFP package, the S32K3X4EVB-Q172 offers dual cores configured in lockstep mode, ASIL D safety hardware, HSE security engine, OTA support, advanced connectivity and low power.

The S32K3X4EVB-Q172 offers a standard-based form factor compatible with the Arduino® UNO pin layout, providing a broad range of expansion board options for quick application prototyping and demonstration.

Target Applications

Automotive Zone Controller (/applications/automotive/vehicle-networking/automotive-zone-controller:AUTOMOTIVE-ZONE-CONTROLLER)

Battery Management System (/applications/automotive/powertrain-vehicle-dynamics/electrification/battery-management-system:BATTERY-MANAGEMENT-SYSTEM)

Belt-Driven Starter Generator (BSG), Turbo Charger, Fan/Pump Controller

Body Control Modules

E-Shifter

Electric Pumps (/applications/automotive/body-and-comfort/electric-pumps:ELECTRIC-PUMPS)

Infotainment IO Controller
