SMD Precision Tweezers

DIN EN 61340 -5-1

- When working on SMD components (SMD = surface mounted device): the fine geometry of the SMD tweezers also allows work to be carried out on electronic components that can be soldered directly onto the circuit board using solderable connecting surfaces
- Handcrafted: polished edges and an excellent matt, scratch-free and non-reflective surface
- For assembly work, laboratory processes, clean room environments, circuit board repairs and reworking in the electronics industry
- High-quality premium stainless steel: high temperature resistance and excellent corrosion resistance to most chemicals, salts and acids
- Antimagnetic to avoid electromagnetic damage
- The variety of designs and jaw types enables small components to be held, positioned and controlled securely in confined spaces
- ESD version only: this allows to compensate in a controlled manner the differences in potential between the operator and electronic components
- ESD versions only: with a tested black epoxy resin coating with a surface resistance between 10^4 and 10^9 ohms
- Stainless steel
