Installation notes

Conductor termination

All conductor types at a glance

Conductor termination

Inserting a conductor via push-in termination.
Solid conductors with cross-sections from either one size above, or up to two sizes below, the rated cross-section can be simply pushed in – no tools needed.

Inserting a conductor via operating tool. Connecting fine-stranded conductors without ferrules, or small cross-sectional conductors that cannot be pushed in, is performed similarly to the original CAGE CLAMP® – just use an operating tool.

Commoning

Commoning two potentials in one single jumper slot via extremely slim staggered jumpers.

Removing a staggered jumper: Insert the operating tool between the staggered jumpers, then lift up the jumper.

The 1-to-3 adjacent jumper for continuous commoning enables every other terminal block to be commoned. For example, positive and negative potentials can be accommodated alongside each other.
