

INTRODUCTION

This patch test hooks can be used in signal and small current connection between main-board and sensor without soldering, which could conveniently work with Beetle board and modules that do not come with pins and contacts.

Fully compliant with UL certification, this patch test hook adopts carefully selected plug that can withstand thousands of times repeat plug and unplug operations. And its plug will not be loose when inserted in a pin. The product offers nearly 200mm wire length, and one pack contains 10 wires with various colors.

RoHS: No.CANEC2007068202

No.TSNEC1900958104

No.SHAEC2004099402
