

# G3VM-21LR11

MOS FET Relays

## High-power, 0.9-A Switching with SSOP Package in a 20-V Load Voltage Model.

RoHS compliant

Note: The actual product is marked differently from the image shown here.

### Application Examples

- Semiconductor test equipment
- Test & Measurement equipment
- Communication equipment
- Data loggers

### Terminal Arrangement/Internal Connections

Note: The actual product is marked differently from the image shown here.

### List of Models

| Package type | Contact form | Terminals                  | Load voltage (peak value) * | Model              | Minimum package quantity |
|--------------|--------------|----------------------------|-----------------------------|--------------------|--------------------------|
|              |              |                            |                             |                    | Number per tape and reel |
| SSOP4        | 1a (SPST-NO) | Surface-mounting Terminals | 20 V                        | G3VM-21LR11        | -                        |
|              |              |                            |                             | G3VM-21LR11 (TR05) | 500                      |
|              |              |                            |                             | G3VM-21LR11 (TR)   | 1,500                    |

Note: Ask your OMRON representative for orders under 1,500 pcs or 500 pcs. We can supply products with the tape already cut.

Tape-cut SSOPs are packaged without humidity resistance. Use manual soldering to mount them.

Refer to common precautions.

\* The AC peak and DC value are given for the load voltage.

### Absolute Maximum Ratings (Ta = 25 °C)

| Item  | Symbol                               | Rating                  | Unit | Measurement conditions        |            |
|---|--------------------------------------|-------------------------|------|-------------------------------|------------|
| Input   | LED forward current                  | IF                      | 50   | mA                            |            |
|   | LED forward current reduction rate   | $\Delta I_F / ^\circ C$ | -0.5 | mA/°C                         | Ta ≥ 25 °C |
|   | LED reverse voltage                  | VR                      | 5    | V                             |            |
| Output  | Connection temperature               | TJ                      | 125  | °C                            |            |
|   | Load voltage (AC peak/DC)            | V <sub>OFF</sub>        | 20   | V                             |            |
|   | Continuous load current (AC peak/DC) | Io                      | 900  | mA                            |            |
|   | ON current reduction rate            | $\Delta I_O / ^\circ C$ | -12  | mA/°C                         | Ta ≥ 50 °C |
|   | Connection temperature               | TJ                      | 125  | °C                            |            |
| Dielectric strength between I/O (See note 1.) | V <sub>I-O</sub>                     | 1500                    | Vrms | AC for 1 min                  |            |
| Ambient operating temperature                 | Ta                                   | -20 to +85              | °C   | With no icing or condensation |            |
| Ambient storage temperature                   | Tstg                                 | -40 to +125             | °C   | With no icing or condensation |            |
| Soldering temperature                         | -                                    | 260                     | °C   | 10 s                          |            |

Note: 1. The dielectric strength between the input and output was checked by applying voltage between all pins as a group on the LED side and all pins as a group on the light-receiving side.

### Electrical Characteristics (Ta = 25 °C)

| Item          | Symbol                                      | Minimum           | Typical | Maximum | Unit | Measurement conditions |   |
|---------------|---|-------------------|---------|---------|------|------------------------|---|
| Input         | LED forward voltage                         | V <sub>F</sub>    | 1.0     | 1.15    | 1.3  | V                      | IF = 10 mA                                      |
|               | Reverse current                             | IR                | -       | -       | 10   | μA                     | VR = 5 V  |
|               | Capacity between terminals                  | C <sub>T</sub>    | -       | 15      | -    | pF                     | V = 0, f = 1 MHz                                |
| Output        | Trigger LED forward current                 | I <sub>FT</sub>   | -       | -       | 3    | mA                     | Io = 100 mA                                     |
|               | Maximum resistance with output ON           | R <sub>ON</sub>   | -       | 0.18    | 0.22 | Ω                      | IF = 5 mA, Io = 900 mA, t < 1 s                 |
|               | Current leakage when the relay is open      | I <sub>LEAK</sub> | -       | -       | 1    | nA                     | V <sub>OFF</sub> = 20 V                         |
|               | Capacity between terminals                  | C <sub>OFF</sub>  | -       | 40      | -    | pF                     | V = 0, f = 100 MHz, t < 1 s                     |
|               | Capacity between I/O terminals              | C <sub>I-O</sub>  | -       | 0.3     | -    | pF                     | f = 1 MHz, Vs = 0 V                             |
|               | Insulation resistance between I/O terminals | R <sub>I-O</sub>  | 1000    | -       | -    | MΩ                     | V <sub>I-O</sub> = 500 VDC, RoH ≤ 60 %          |
|               | Turn-ON time                                | t <sub>ON</sub>   | -       | 0.3     | 2    | ms                     | IF = 5 mA, RL = 200 Ω, VDD = 10 V (See note 2.) |
| Turn-OFF time | t <sub>OFF</sub>                            | -                 | 0.2     | 1       | ms   |                        |   |

Note: 2. Turn-ON and Turn-OFF Times

### Recommended Operating Conditions

Use the G3VM under the following conditions so that the Relay will operate properly.

| Item                                 | Symbol   | Minimum | Typical | Maximum | Unit |
|--------------------------------------|----------|---------|---------|---------|------|
| Load voltage (AC peak/DC)            | $V_{DD}$ | -       | -       | 20      | V    |
| Operating LED forward current        | $I_F$    | -       | -       | 20      | mA   |
| Continuous load current (AC peak/DC) | $I_O$    | -       | -       | 900     | mA   |
| Ambient operating temperature        | $T_a$    | -20     | -       | 65      | °C   |

### Engineering Data

LED forward current vs. Ambient temperature

Continuous load current vs. Ambient temperature

LED forward current vs. LED forward voltage

Continuous load current vs. On-state voltage

On-state resistance vs. Ambient temperature

Trigger LED forward current vs. Ambient temperature

Turn ON, Turn OFF time vs. LED forward current

Turn ON, Turn OFF time vs. Ambient temperature

Current leakage vs. Load voltage

Output terminal capacitance vs. Load voltage

### Safety Precautions

- Refer to "Common Precautions" for all G3VM models.

# Appearance/Dimensions

This announcement is based on product catalogue information previously shown before its discontinuation  
Product information of the existing product may be different from the previous version

## ■ Appearance

### SSOP (Shrink Small Outline Package)

SSOP4

Note: The actual product is marked differently from the image shown here.

## ■ Dimensions

(Unit: mm)

### Surface-mounting Terminals

Weight: 0.03 g

### Actual Mounting Pad Dimensions

(Recommended Value, TOP VIEW)

Unless otherwise specified, the dimensional tolerance is  $\pm 0.1$  mm.

Note: The actual product is marked differently from the image shown here.

- Application examples provided in this document are for reference only. In actual applications, confirm equipment functions and safety before using the product.
- Consult your OMRON representative before using the product under conditions which are not described in the manual or applying the product to nuclear control systems, railroad systems, aviation systems, vehicles, combustion systems, medical equipment, amusement machines, safety equipment, and other systems or equipment that may have a serious influence on lives and property if used improperly. Make sure that the ratings and performance characteristics of the product provide a margin of safety for the system or equipment, and be sure to provide the system or equipment with double safety mechanisms.

Note: Do not use this document to operate the Unit.
