#### Adjustments

Adjustment: teach-in via plus/minus buttons (WFxx-B416)

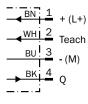

① Function signal indicator (yellow), switching output

② Function indicator (red)

③ "+"/"-" buttons and function button

#### Concept of operation

- 1. Position label or substrate in the active area of the fork sensor
- 2. Move multiple labels through the fork sensor

Press both the "+" and "-" buttons together, hold > 1 s and than release the teach-in buttons. The red LED flashes.

Press "-" button, teach-in process is finished.

#### Notes

Switching threshold adaptation:

Only, the first teach-in procedure after switching on is permanently stored. Teach-in can be repeated cyclically. Switching output also during teach-in active.

Once teach-in process is complete, the switching threshold can be adjusted at any time using the "+" or "-" button. To make minor adjustments, press the "+" or "-" button once. To configure settings quickly, keep the "+" or "-" button pressed for longer.

 $\pm \frac{2}{3s}$  Press both the "+" and "-" buttons together (3 seconds) to lock the device and prevent unintentional actuation.

 $\frac{1}{6}$  Press both the "+" and "-" buttons together (6 seconds) to define the switching function (light/dark switching). Standard setting: O = light article to the setting of the switching of the setting of the switching of

Teach-in (static): Setting the switching threshold without movements of label, cf. operating instruction.
