Description

This Series is a cup design Heel Grounding Strap that provides the end user with an effective means of charge dissipation in the static protected areas. This product is made out of a 2-layer rubber material. Inner layer is beige and static dissipative, and the outer layer is conductive in black colour. Adjustment is made easy through an elastic hook and non-elastic loop Blue material. The product has a 22" long conductive tab for skin contact and a sewn-in 1 Meg current limiting safety resistor.
