PowerPAT Plus
## Software

PowerPat Plus Key features,

- Dedicated PAT Software.
- Downloads and imports data from various PAT Testers.
- Simple and easy to use, supplied complete with Robin COM 3 download lead

PowerPAT Plus is a Windows based software package that has been designed to manage all of your portable appliance test records.

When used in conjunction with a portable appliance tester capable of downloading test records such as the Robin **SmartPAT 5500** the software will automatically accept downloaded results and can be used to produce professional looking reports and documentation.

The Windows environment makes the software simple and easy to use and the package includes a number of important user functions including the ability to compare previous test records with new test results.

Note: In addition to Robin's Portable Appliance Testers, the software is compatible with the majority of Portable Appliance Testers currently available. Please check with Robin's Software Support Help Desk to confirm compatibility.
