### Product Description

The MB206L-B is an Internal SlimSAS x8 (SFF-8654) to Dual OCuLink x4 (SFF-8611) Cable to connect an HBA/RAID card to the following ICY DOCK enclosures :

Note: This cable is fully reversible, allowing you to effortlessly flip it between the Controller/Root and the Backplane/Endpoint for seamless connectivity. Please ensure that the backplane and devices you are using comply with the SFF-9402 standard for optimal performance.

### Main Features

- Length: 0.5 meters (19.69 inch)
- Connectors comply with SFF-8654, SFF-8611 design specifications
- Transfer speeds to meet PCIe 4.0 specifications
- OCuLink connectors featuring locking latch design for secure connections
- SFF-9402 compliant cable design supports mainstream NVMe/Tri-mode HBA/RAID cards
- Cable has passed the UL20744 certification and meets the safety requirements

### Specification

Brand:	ICY DOCK
Item Number:	MB206L-B
Length:	0.5 meters/19.69 inch/500mm
Cable Type:	SlimSAS 8i SFF-8654 to 2x OCuLink 4i SFF-8611 Cable
Connectors:	SlimSAS 8i (SFF-8654)
Connectors (Other Side):	2x OCuLink 4i (SFF-8611)
Warranty:	2 years warranty
