Weller®

WD2000AU
2x80W Digital Soldering Station

Dual Channel Digital Soldering station
160 W, 230 V with 2 x soldering iron WP80 (80 W)

- Microprocessor-controlled soldering station in a modern ergonomic design for Weller soldering tools up to 150 W
- Temperature control 50°C– 450°C (150°C– 550°C with WSP 150)
- Big LCD display
- Three fixed temperatures can be assigned with the temperature buttons.
- The following settings are possible without any accessory unit: custom-designed calibration function, programmable temperature decrease (setback), interlock functions and remote ID for ISO applications.
- The antistatic design of the safety rest has got four different settings.
- The soldering tools themselves are recognised automatically by the WD Station and the corresponding control parameter assigned.
- Protection class I (control unit), protection class III (soldering iron)
- Equipotential bonding (normal state hard grounded)
- Dimensions: 134 x 108 x 147 mm (L x W x H)

Consists of:
- WD2 control unit
- 2 x WP80 soldering iron with LT B tip
- 2 x WDH10 safety rest
