

# KM6-II Subracks: Dust covers

## TOP AND BASE COVER KITS

This range of top and base covers are suitable for fitting to both Standard and Universal KM6-II subracks and KM6-EC subracks.

Two depths are available for protecting the guide area of 160mm or 220mm boards. The covers are available in ventilated or unventilated versions and can be fitted after the subrack has been assembled. A slot in the rear tie bar captures the cover and plastic clips secure it to the front. The cover can thus be easily removed for access.

### Contents of kit

Item/Description	Qty.	Material/Finish
Covers	2	0,9mm aluminium alloy BS14705251 (NS4H6) conductive clear chromate
Cover retaining clips	8	Grey ABS

## OTHER CONFIGURATIONS

It is possible on Universal Subracks to use the EMC covers as ordinary covers when the tie bars are set in certain configurations. Call us for details.

## REAR COVER KITS

Suitable for both Standard and Universal KM6-II Subracks, these are available in heights of 3U and 6U and are assembled to the endplates. All KM6-II endplates are pre-punched to accept these covers.

The rear cover adds 41mm to the overall depth of a subrack.

### Contents of kit

Description	Qty.	Material/Finish
Cover	1	0,9mm aluminium alloy BS14705251 (NS4H6) conductive clear chromate
All fixings
