

PD55003L-E

RF POWER TRANSISTOR *The LdmoST Plastic FAMILY*

General features

- Excellent thermal stability
- Common source configuration
- $P_{OUT} = 3W$ with 17dB gain@500MHz/12.5V
- New leadless plastic package
- ESD protection
- Supplied in tape & reel of 3K units
- In compliance with 2002/95/EC european directive

Description

The PD55003L-E is a common source N-Channel, enhancement-mode lateral Field-Effect RF power transistor. It is designed for high gain, broadband commercial and industrial application. It operates at 12V in common source mode at frequencies of up to 1GHz. PD5500L-E boasts the excellent gain, linearity and reliability of STH1LV latest LD-MOS technology mounted in the innovative leadless SMD plastic package, PowerFLAT™.

PD5500L-E's superior linearity performances makes it an ideal solution for car mobile radio.

4 Package mechanical data

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect . The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com
