

The FLX and FLXT Series offer two unique, attractive, sturdy *utility* enclosure designs that have the built in **FLEXUTILITY** that allows your custom features to be molded in with a simple, quick tooling change. Your custom features can include a wide range of aesthetic and mechanical design options such as molded in bosses, LCD openings, keypad openings, connector openings, battery doors, and raised three-dimensional graphics, to name a few. Applications are virtually limit-less.

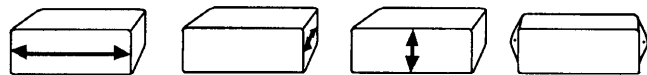

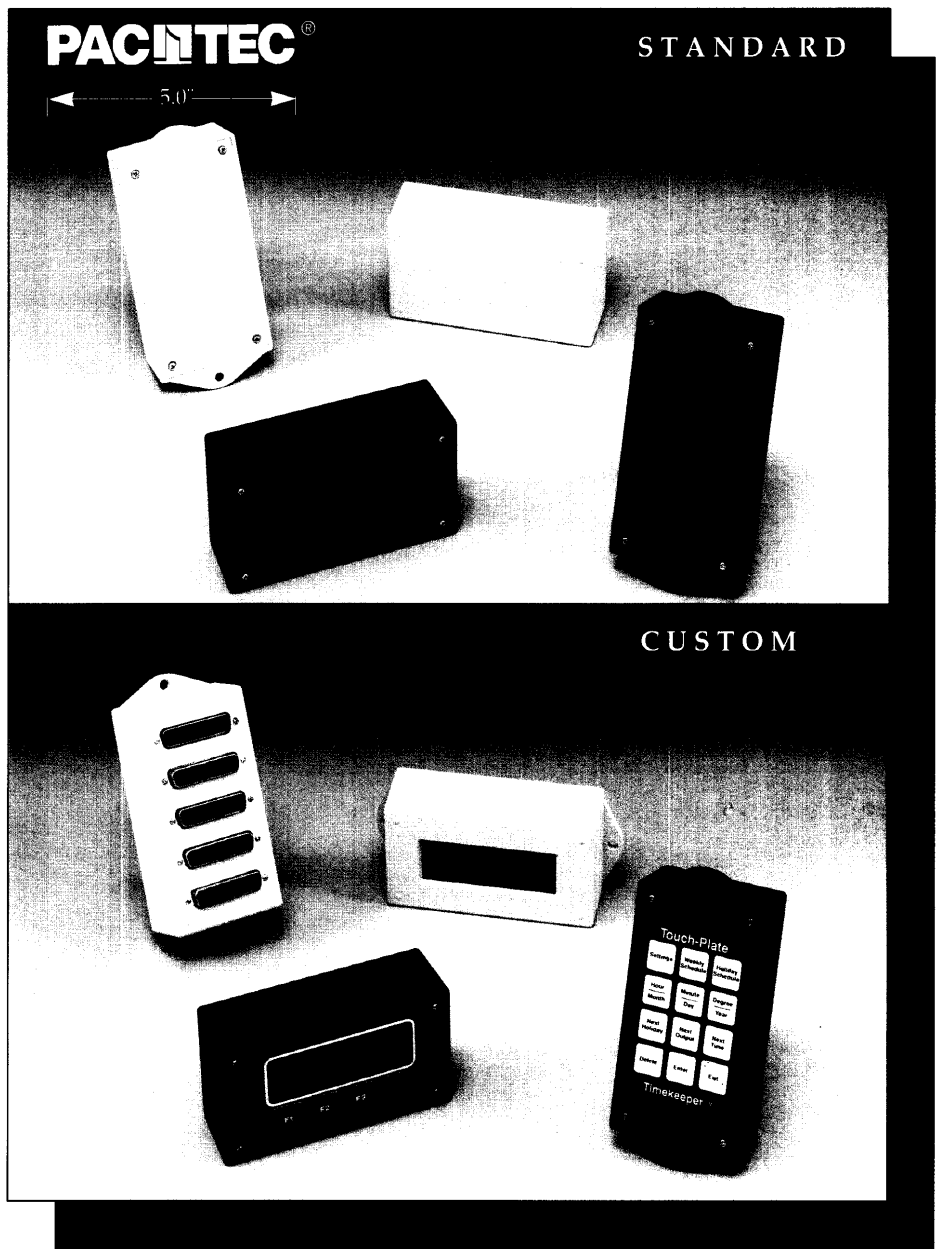

- LAN/WAN interconnection devices
- Digital display units
- Keypads
- Security devices
- Interfaces/junction boxes
- Magnetic stripe/bar code card readers
- Sensing devices

The FLX Series comes with molded top and bottom covers, four screws, and molded in texture for long lasting aesthetics.

The FLXT Series comes with a molded bottom cover with two mounting tabs and a .062 plastic panel .

- Mounting bosses for PCB assembly
- Standard material: 94V-0
- Colors: PC Bone and Black
- Other colors and materials available on request
