**✓RoHS HDMI Cable Assemblies - Fully Molded**

High Definition Multimedia Interface (HDMI) is the latest interface for the connection of audio/video equipment. HDMI is the first industry supported uncompressed all digital audio/video interface. HDMI is fully backwards compatible with DVI video signals and simplifies interconnections between the signal generating device and the display device by including both the audio and video digital signal in one interface.

**✓RoHS HDMI Repeater Cables - Extend Length of Signals up to 20 Meters**

L-com's new RHDMMIMM series repeater cables extend the length of HD HDMI signals up to 20 meters (RHDMMIMM-20M) without the use of an external converter/booster. These unique repeater cables make A/V installations easy and aesthetically pleasing as the repeater module is built right into the assembly. Additionally the fully shielded cable design protects against EMI/RFI.

**✓RoHS Premium HDMI Cable Assemblies - High Density Double Shielded PVC Jacket Protects Against EMI/RFI**

L-com's Premium series HDMI cable assemblies are HDMI 1.3 Certified and support up to 1080p resolution. These quality constructed assemblies feature rugged overmold connectors and double shielded PVC jackets ensuring durability. Available in five standard off the shelf lengths, these HDMI cables are perfect for any HDMI A/V application. Custom cable lengths are available upon request.

**✓RoHS Standard HDMI Male to Male Cable Assemblies - HDMI 1.3 Certified**

L-com's standard series HDMI cables offers a cost effect way to support myriad HDMI A/V applications. Each cable is functionally tested to ensure top performance and features rugged overmold connectors and double shielded PVC jackets which protect against EMI/RFI. Available in four standard off the shelf lengths, these HDMI cables are perfect for all your HDMI application needs. Custom cable lengths are available upon request.

**✓RoHS HDMI to Mini HDMI Cable Assemblies**

Our HDMI to Mini HDMI cables are perfect for connecting standard HDMI interfaces to Mini HDMI peripherals such as camcorders, displays and digital cameras. By utilizing these assemblies there is no need to purchase a separate standalone adapter. Each cable is functionally tested to ensure top performance and features rugged overmold connectors and double shielded PVC jackets which protect against EMI/RFI. This series is available in five standard off the shelf lengths. Custom cable lengths are available upon request.

**✓RoHS DisplayPort High Definition Audio/Video Cables - The New Digital Display Standard**

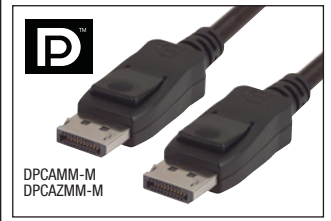

L-com's DisplayPort (DP) cables offer a single cable solution providing high definition digital audio and video for computing displays, graphic cards and laptops. The DP Technology replaces DVI and VGA cables and is the new digital display standard. It is the HDMI™ equivalent for computers and provides a simple and easy connection for both high definition digital audio and video. Additionally, LSZH versions are offered for specialty applications.

**✓RoHS DisplayPort DVI and HDMI Adapters - DP Male to Either DVI or HDMI Female**

L-com offers several adapter options for converting new DisplayPort interfaces to legacy DVI and HDMI equipped products. By utilizing these easy to install adapters, you can protect your original investment and avoid costly upgrades. These active adapters convert DVI or HDMI signals to DisplayPort right inside the adapter.

<a href="#">ADP-DVI-MF</a>	DisplayPort Adapter, DisplayPort Male to DVI Female	30.50	28.67	26.84	25.01	23.18
<a href="#">ADP-HDMI-MF</a>	DisplayPort Adapter, DisplayPort Male to HDMI Female	30.50	28.67	26.84	25.01	23.18

**Tip What is HDMI Certification?**

The HDMI consortium has created a certification level for HDMI products where the higher the certification number the higher the bandwidth handling capabilities and /or new features the cable can support such as audio video sync, one bit audio, DVD audio etc. For example HDMI certification 1.0 supports throughput a of 4.9 Gbps and certification level 1.3b1 supports a throughput of 10.2 Gbps. Additionally version 1.3a supports features that 1.0 does not provide such as support of the new Type C mini-connector for portable devices and automatic audio syncing.

**RoHS status information**  
 listed on every product saves you time.
