Dragon Tooth®

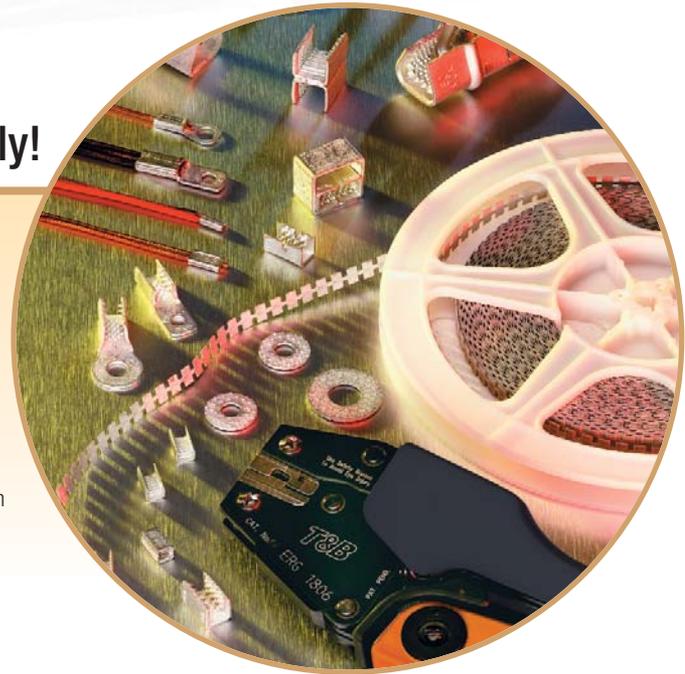

Overview

Splice, tap and terminate magnet wire quickly and easily!

The tough, high-temperature insulation on magnet wire used by electrical motor and transformer manufacturers creates problems in splicing and terminating. The durability of magnet wire insulation has made dip-soldering or brazing extremely difficult without stripping the insulation.

Another splicing and terminating challenge involves the use of aluminum for magnet applications. A manufacturer connecting aluminum magnet wire to copper is faced with the problem of the different coefficients of thermal expansion of the two metals, galvanic corrosion, cold flow, and the rapid formation of oxide film on the wire surface.

T&B offers a solution for a highly reliable connection method for magnet wire. It eliminates welding, no longer requires removal of insulation, and it can be installed in seconds. No special operator skills are needed. The connector and matching tooling do the entire job. To meet the essential requirements of magnet wire connections, T&B offers the insulation piercing Dragon Tooth® compression connector.

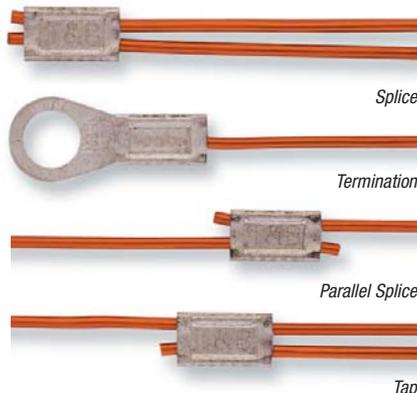

Transformer manufacturers depend on Dragon Tooth® connectors for reliable magnet wire applications.

Dragon Tooth® Magnet Wire Connectors

Thomas & Betts Dragon Tooth® connectors and installing tools are designed to splice, tap, and terminate magnet wire from 32 AWG to 460,000 CMA copper and from 20 AWG to 460,000 CMA aluminum conductors in motor and transformer applications. Dragon Tooth® Magnet Wire Connectors penetrate the insulation and oxide layers to make electrical contact on magnet wiring. The result is permanent, low-resistance electrical connections, capable of maintaining contact integrity throughout the life of the connection.

- Designed to penetrate magnet wire insulation during application, eliminating the need for stripping, brazing, welding, or other methods of joining magnet wire
- Can be installed in seconds
- Requires minimal training for installation
- Made of copper alloy, tin plated, with teeth on the inner surface
- Splices and taps have an open side enabling easy access to wire and making internal coil tapping possible
- For aluminum to copper, aluminum to aluminum, or copper to copper magnet wire connections
- Supplied with bolt holes to accommodate No. 6 through ½" studs and includes male and female .250 x .032" disconnects
- Splices and fork terminals accommodate wire sizes 24 AWG to 12 AWG in a variety of combinations, including combining magnet wire with stripped wire lead. For solid or stranded wire #20 to #4/0 AWG
- Larger connectors accommodate circular mil range from 50,000 to 460,000 cm
- Connector and matching tooling do the entire job

Typical Applications

Overview

Dragon Tooth® connectors transform the perpendicular compression force, which would normally contribute to conductor creep, into distributive forces that effectively resist cold flow, as indicated by the illustration **below**.

These connectors are made of copper alloy, tin plated, with a number of teeth on the inner surface. When compressed onto an insulated magnet wire, the sharp, hardened teeth penetrate both the insulation and oxide and bite into the conductor. An electrically sound, low-resistance connection is established as a result of the combination of high pressures at the edges of the teeth, and the sliding action between the teeth and the conductor. The open barrel design permits midspan splicing and tapping.

These connectors are made of copper alloy, tin plated, with a number of teeth on the inner surface. When the connector is compressed onto an insulated magnet wire, the sharp, hardened teeth penetrate the insulation and the oxide and bite into the conductor. An electrically sound, low-resistance connection is established as a result of the combination of high pressures at the tip and edges of the teeth, and the sliding action between the teeth and the conductor.

Dragon Tooth® connectors transform the perpendicular compression force, which would normally contribute to conductor creep, into distributive forces that effectively resist cold flow.

For wire sizes and combinations other than shown, contact Thomas & Betts Technical Services at 800-888-0211, ext. 8324.

Formula for Calculating Circular Mil Area (CMA)

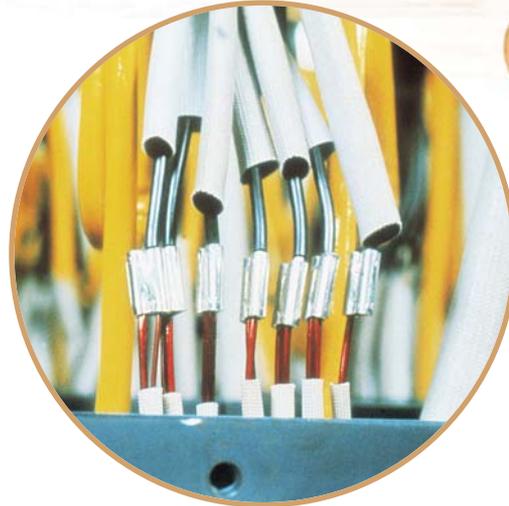

For square or rectangular wire:

$$\text{Thickness} \times \text{Width} \times 1.273 \times 10^6 = \text{CMA}$$

For round wire:

$$\text{Diameter}^2 \times 10^6 = \text{CMA}$$

(or see chart on p. K-8)

How to Select a Connector

- 1 Determine total circular mil area (CMA). All wires to be installed in a connector barrel including stripped, stranded wire. For example, two #6 AWG = 52480CMA.
- 2 Refer to Circular Mil column of chart and find the connector series corresponding to the total CMA. For example, 204XXX.
- 3 Next, refer to either Round Wire column or Rectangular Wire column, depending on the type you are using, and check for any limitations, (such as max. wire width/height). If there are limitations, you may have to make a selection from the next larger size.
- 4 Select the tool and die appropriate for the application.

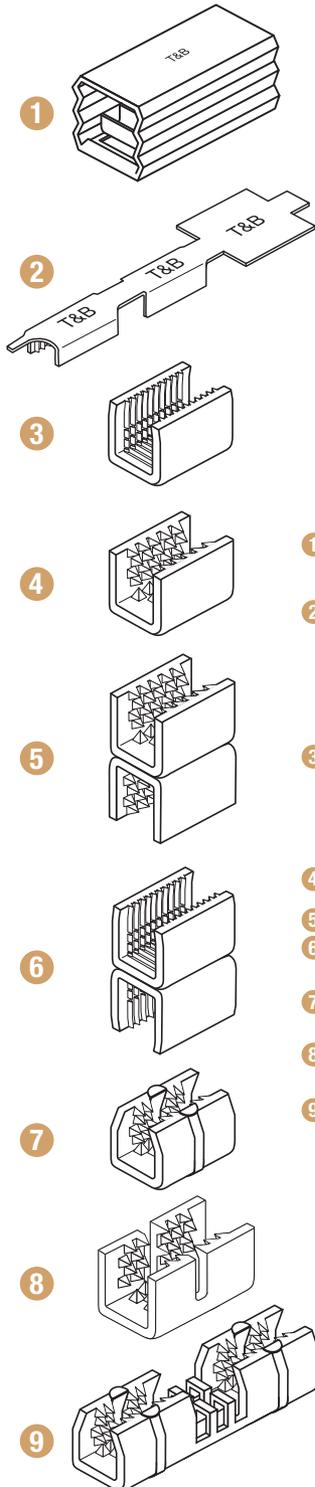

Dragon Tooth®

Insulating Piercing Connectors

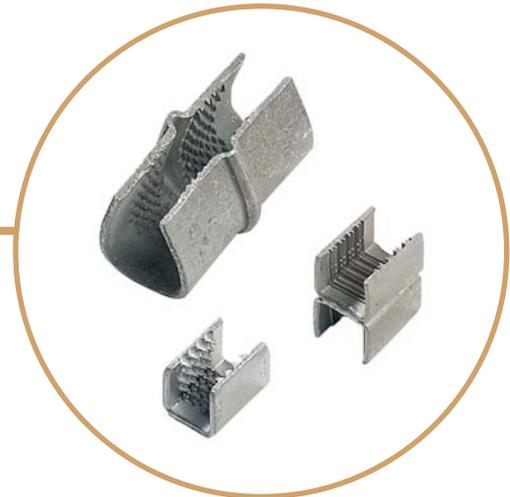

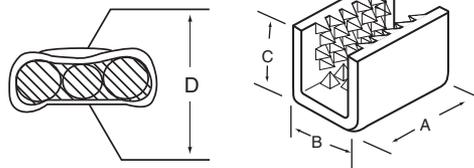

Splices for copper and aluminum magnet wire!

Dragon Tooth® Insulation Piercing Connectors

Splices

- Penetrate all standard copper and aluminum magnet wire insulations
- Perfect for heavy Formvar, poly-thermaleze, polyester, and polyurethane insulations

For special insulations, consult Technical Services.

*Reference dimension. See installing die illustration for gauging.

** Not recommended for aluminum magnet wire finer than 21 gauge. (a) Four wires max. (b) Six wires max. (c) Six wires max. each barrel (d) Conductors heavier than 6 AWG require special dies. Contact Thomas & Betts for assistance.

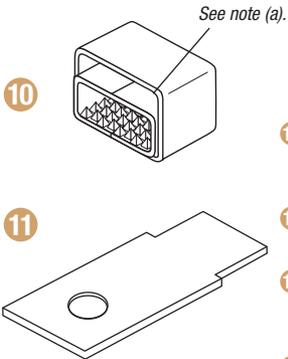

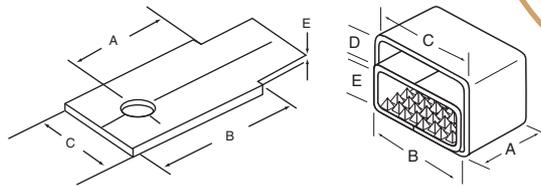

(e) Crimping dies may not bottom. Connector height will depend on number and size of wires in barrel. Pump must deliver 9800 psi minimum. (f) Copper CMA, aluminum CMA=52,136-124,561.

† On a reel

(a) This space may be used for terminal tongue insert, stripped stranded copper wire, stripped copper magnet wire, or left empty.

NOTE: Wire sizes and combinations shown have been tested to and meet or exceed Thomas & Betts specifications. Connectors may be suitable for other wire sizes or combinations. Thomas & Betts sells these connectors with the understanding that the user will perform necessary tests to determine their suitability for the intended purpose.

NOTE: Wire sizes and combinations shown have been tested to and meet or exceed Thomas & Betts specifications. Connectors may be suitable for other wire sizes or combinations. Thomas & Betts sells these connectors with the understanding that the user will perform necessary tests to determine their suitability for the intended purpose.

Additional Magnet Wire Ordering Information

1. For wire sizes and combinations other than shown, consult factory.
2. Maximum of two layers of conductors in each connector.
3. Consult factory for gauging other than shown.
4. When terminating wires with an AWG size difference of four or more, samples should be tested in completed connections before using.

Crimp with comfort!

Ergonomic Manual Installation Tools

- Fixed die tool
- Incorporates the ergonomically designed Comfort Crimp® tool handles, which distribute the force more evenly across the hand
- Shure-Stake® mechanism ensures a complete crimp cycle before the tool releases
- Rubberised thermoplastic handles combine maximum friction with a soft, comfortable feel that reduces muscle tension
- Two-piece movable die nest provides easy connector removal (ERG811 has single die nest)

Dragon Tooth® Insulation Piercing Connectors

T&B TOOL WARRANTY

You can choose Thomas & Betts tools with confidence, because we stand behind them with our warranty.

See page **B-101** for additional warranty information.

1 Year

- Cable Tie Installation Tools
- Printers
- Cable Cutters & Strippers
- Dies

2 Years

- Mechanical Hand Tools with Shure-Stake® Mechanism
- Pneumatic Tools
- Hydraulic Pumps
- Battery-Operated Tools

5 Years

- Mechanical Hand Tools without Shure-Stake® Mechanism
- Hydraulic Tools (self-contained and remote heads)

Battery-Powered Crimping Tools

1½ tons of grip that weighs less than three pounds!

Battery-Powered Crimping Tool — BAT22-6

T&B's newest battery-powered tool is fast and portable for making high-volume and difficult-to-reach terminal installations in a snap. The BAT22-6 delivers 1.5 tons of crimping force with an easy, pushbutton trigger. The lightweight, ergonomic design minimizes the risk of repetitive motion injuries that can occur with traditional hand crimping tools. And at less than three pounds, one-hand operation is easy while still packing enough power to crimp up to 6 AWG terminals in seconds.

- Interchangeable dies can be quickly changed to crimp non-insulated and insulated terminals up to 6 AWG
- Dies are the same as our hand tools—crimps will be exactly the same between Sta-Kon® hand tools such as our ERG-2001 and the new BAT22-6
- 360° rotating head gives the user the added flexibility when crimping hard-to-reach connections
- Short cycle time equates to crimping times of less than two seconds
- Quick, lightweight, and maneuverable
- NiCd battery operation provides long-lasting battery life to complete up to 150 crimps on a single charge
- Extra battery and charger are included with the tool, ensuring round-the-clock operation
- Battery charger provides full battery life in under an hour
- Linear crimping motion gives a symmetric, high-quality crimp every time

Easy to rotate with your wrist—delivers fast and effective crimping power.

Uses the exact dies of the Comfort Crimp line of ergonomic tools for Sta-Kon, Spec-Kon, and Dragon Tooth.

Specifications

Crimping Force — 2,900 lbs. max.

Crimps per Charge — 150

Wire Crimping Range —
Up to 6 AWG

Dimensions —
25.4" (645 mm) Length
3.1" (79 mm) Width
2.1" (53 mm) Height

Crimp Cycle Time — 2 seconds

Power Supply — 9.6V NiCd
battery

Tool Weight (With Battery) —
2¾ lbs.

Recharging Time — 1 hour

Included Accessories

- Sturdy, plastic carrying case for portability
- Two 9.6V NiCd batteries and battery charger
- Sturdy tray for convenient storage of crimp dies

CAT. NO.	DESCRIPTION	PKG. QTY.
BAT22-6	Battery Crimping Tool 1.5 Ton with 120 VAC Charger	1

Tool purchase includes crimping tool, two 9V batteries, charger, and case.

*Dies sold separately.

Perfect for high-speed installation!

BAIR22-6 — Heavy-Duty Bench-Top Air Crimp Tool

- Bench mounted for stability and operator control
- Compact size, all-metallic construction
- Delivers 1.8 tons of crimping force at 100 psi
- Heavy-duty and installs wide range of Dragon Tooth connectors

..... Specifications

Height — 12"
Operating Pressure — 85–100 psi
Base — 8" Square
Weight — 17 lbs.

BAIR22-6

CAT. NO.	DESCRIPTION
BAIR22-6	Equipped with Shure-Stake® Mechanism, Ensuring Full Crimp Cycle Before Release

Pneumatic power!

PAIR22-6 — Heavy-Duty Portable Air Crimp Tool

- Installs Dragon Tooth® terminals
- Hand actuated
- Delivers 1.25 tons of crimping force at 100 psi
- 3 interchangeable dies can crimp the 22xxx1, 22xxx2, and 22xxx6 series terminals

PAIR 22-6

..... Specifications

Overall Length — 14" **Operating Pressure** — 90–100 psi
Diameter — 2¼" **Weight** — 2.5 lbs.

Continuous reel crimping!

Auto-Feed Tool for Magnet Wire Connectors on Strip

- Foot pedal contains T&B Shure-Stake® control mechanism, which ensures a full compression each time
- Insulation piercing connectors are fed on a continuous reel-mounted strip
- Dies are self-contained
- Includes foot valve, hoses, and air treatment system
- Pneumatic bench-mounted foot-operated tool for crimping copper or aluminum magnet wire and copper lead wire, not solder dipped or bonded

Air Hydraulic Tools

Rugged and portable!

6-Ton Hydraulic Head

- Lightweight design—weighs less than 7 lbs. including dies
- Includes steel carrying case

Specifications

Output Force — 6 tons nominal

Operating Pressure — 10,000 psi nominal (safety bypass on pump set at 9800 psi)

Tool Weight — 6½ lbs. (without dies)

Tool Dimensions — 13½" long, 3½" wide

- Tool carrying case included
- Dies are ordered as a set (2 pieces)
- Upper and lower dies are identical

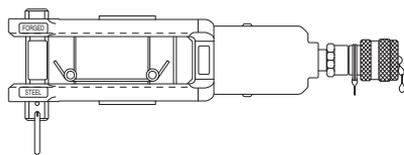

CAT. NO.	DESCRIPTION
TBM6H	The TBM6H Remote Hydraulic Crimping Head is a lightweight but powerful compression tool. The TBM6H operates from any 10,000 psi hydraulic pump.

See die chart on **page K-14** for complete listing of dies and connectors used with TBM6H.

Powerful and reliable!

12-Ton Hydraulic Head

- 12 tons output (nominal)
- 10,000 psi max. hydraulic operating pressure
- Weighs 15 lbs.

Specifications

Output — 12 tons (nominal)

Hydraulic Operating Pressure — 10,000 psi (max.)

Length (with coupling) — 14½"

Width — 3¼"

Weight (without dies) — 15 lbs.

CAT. NO.	DESCRIPTION	PKG. QTY.
13400	12-Ton Hydraulic Head (Dies Ordered Separately)	1

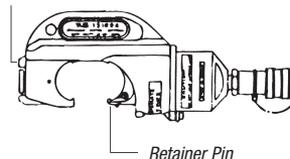

See die chart on **page K-14** for complete listing of dies and connectors used with 13400.

Lightweight design!

14-Ton Hydraulic Head

- 14 tons output (nominal)
- 10,000 psi max. hydraulic operating pressure
- Weighs 10 lbs.

Die Release Knob

Retainer Pin

Specifications

Output — 14 tons (nominal)

Hydraulic Operating Pressure — 10,000 psi (max.)

Length (With Coupling) — 11½ in.

Width — 2½"

Height — 4¼"

Piston Diameter — 1.812"

Piston Stroke — 1.5" max.

Weight (Without Dies) — 10 lbs.

CAT. NO.	DESCRIPTION	PKG. QTY.
13100A	Remote 14-Ton Hydraulic Head (Dies Ordered Separately)	1

See die chart on **page K-14** for complete listing of dies and connectors used with 13100A.

Crimp larger connectors easily!

15-Ton Hydraulic Head

- Longer, slimmer profile enables easier access into tight spaces
- Wider jaw opening eases crimping of larger connectors
- Head made of forged steel and insulated with rubber boot
- Steel carrying case is included
- Longer, slimmer profile enables easier access into tight spaces

Specifications

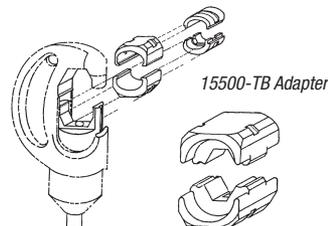

Output Force — 15 tons nominal

Operating Pressure — 10,000 psi nominal

Cylinder — 2" dia.

Tool Weight — 16½ lbs. (without dies)

Installs — 8 AWG – 1500 MCM Copper; 10 AWG – 1000 MCM Aluminum

CAT. NO.	DESCRIPTION	PKG. QTY
TBM15I	Insulated 15-Ton Hydraulic Tool; Carrying Case Included	1

Electric Hydraulic Pump

- Up to 10,000 psi output pressure
- Durable construction
- Hand or foot actuated

CAT. NO.	DESCRIPTION
13810	Electric hydraulic pump, 10000 psi with Shure-Stake mechanism feature; this is a heavy-duty OEM pump with high flow rate; 115V, 60Hz, 1½ HP, 23A; requires hand or foot control.

You may also need...

13611	Hand Switch for 13810
13612	Foot Switch for 13810
13613	High Pressure, Steel Reinforced Hydraulic Hose; 6 ft.
13614	High Pressure, Steel Reinforced Hydraulic Hose; 10 ft.
13619	High Pressure, Plastic Hydraulic Hose; 10 ft.

13600 This electric hydraulic pump is for use with all T&B hydraulic heads—consists of pump with pressure gauge and Pioneer type male coupler; add suffix **WG** to eliminate gauge; output pressure 9800 psi; order switch and hose separately.

You may also need...

13620	Hand Switch—10 ft.
13589A	Foot Switch—10 ft.
13619	10-ft. Non-Metallic Hose
13618	20-ft. Non-Metallic Hose

A remote control switch is required. Order Cat. No. 13620 for hand operation or Cat. No. 13589A for foot operation.

All pumps are supplied with a metal carrying case.

13610A Shure-Stake® electric hydraulic pump has same features as 13600, but includes the Shure-Stake® control mechanism; prevents under crimping; (pump pressure must reach 9,800 psi before recycling); requires hand or foot control; order switch and hose separately.

You may also need...

13611	Hand Switch—10 ft.
13612	Foot Switch—10 ft.
13797	In-line hydraulic pressure inspection gauge with male and female pioneer-type coupler.

A remote control switch is required to operate this unit. Use either a #13611 (hand) or #13612 (foot) switch.
