- GB20T/ENC is supplied with capacitor for DC line monitoring
- For UK supply only a 3m cable tail is fitted as standard. We can supply different lengths on request. Because the cable tail is pre-fitted the tapping needs to be specified when ordering otherwise the speaker will be tapped at 10w. **For all other countries** the GB 20T/EN & ENC will **NOT** be supplied with a cable tail.
- Recommended for internal use only

FREQUENCY RESPONSE

GB20T/EN & GB20T/ENC has been tested in 100 hours max power (10W). The model does not deviate by more than ± 3dB from the original test value. The frequency response curve and impedance complies with the original one. All SPL tests are performed in an anechoic chamber (<70m³)
