Sample Availability Date (Changed Part) December 28, 2018

Planned Implementation Date February 18, 2019

RELEASED

Before Change

After Change

BEFORE: The Delivery Unit (DU) was equivalent to the inner carton quantity and could be added to orders of Minimum Line Quantity (MLQ).

AFTER: The Delivery Unit (DU) is equivalent to a full master carton. Minimum Line Quantity (MLQ) is equivalent to 1 or more Delivery Units.

- Example: part 190030001
 - Before: Individual box quantity (DU) = 1,000; Minimum Line Quantity (MLQ) = 4,000
 - Result is non-standard shipping configurations with packaging filler and voids, in various multiples of 1,000
 - After: New standard shipping qty = 4 boxes of 1,000 = Delivery Unit of 4,000
 - Next available quantity above MLQ of 4,000 is 8,000 (Delivery Unit x 2)
- No impact to product, smallest package quantities, or boxes

Overview

- Parts from Molex's Tampa Bay Operations to be ordered in multiples of master carton quantities, typically equal to current minimum line quantities.
- The reason for change is for the environmental benefit of reducing use of extra pack filler in our shipments, which creates unnecessary waste. In addition, the product is better protected by the elimination of voids in the shipping cartons.
- Product Impact
 - No change to product, *no change to individual resaleable package quantities or box/reel sizes.*
- Part Number Impact
 - See attached impacted parts list
