

## STILE B200P

### Gooseneck Microphone Universal Base with Push-to-Talk Button

STILE B200P is a universal base for gooseneck microphones designed for positioning on tables or desks. It weighs 410g (14.46oz.) and assures high stability even in case of accidental bumps against the microphone.

The base is equipped with a **Push-to-Talk button**, which activates the microphone only when pressed, and green light. It features **2x 1.5V AA type batteries** (not included) to power any condenser or back-electret capsules with 3V Phantom Power. It also accepts any external **Phantom power up to 48V** coming from the output audio cable.

## PRODUCT DETAILS
