

Lumina Desk Lamp

The Lumina Desk Lamp is a sturdy lamp with a flexible goose neck that clamps to the edge of a desk or any flat surface.

A modern design that provides a long reach when required but can easily be adjusted to a shorter length by bending the goose neck, making it ideal for crafters, mobile beauty, reading and users with low levels of vision.

The remote control gives the user the ability to adjust both the brightness and colour temperature, as well as turning the light on and off from a distance.

The Lumina Desk Lamp is available in White and Black.
