Chameleon Mini USB Lamp

A sturdy desk lamp, with 3 colour settings.
Ideal for working with intricate detail.

The Chameleon Mini USB Magnifier is a modern designed, sturdy desk magnifier. It has 1.75X magnification, making it ideal for crafters, reading and users with low levels of vision.

This lamp is ideal for working with intricate detail. The bright LEDs clearly light up the area the lamp is shining on and features three buttons on the cable, which control the colour temperature of the lamp (2800K, 4000K and 6500K), as well as adjusting the brightness of light.

It is powered by USB so can be directly plugged into a sewing machine USB, battery pack or the mains with the plug supplied.

FEATURES

- Flexible anglepoise arm.
- 3 step dimmer technology.
- 1.75X magnification lens.
