Subject: PSX Series Product Label Update

Document Number: LFPCN_PG0139

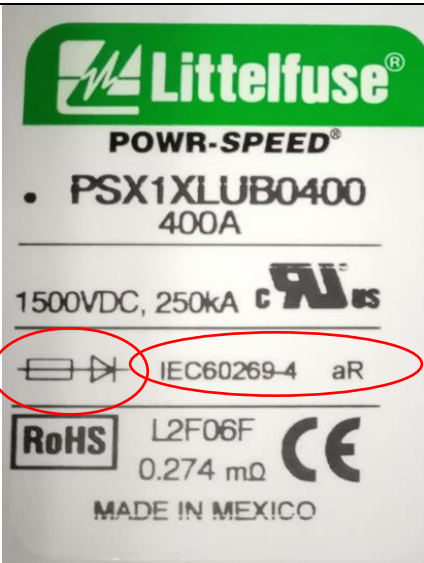

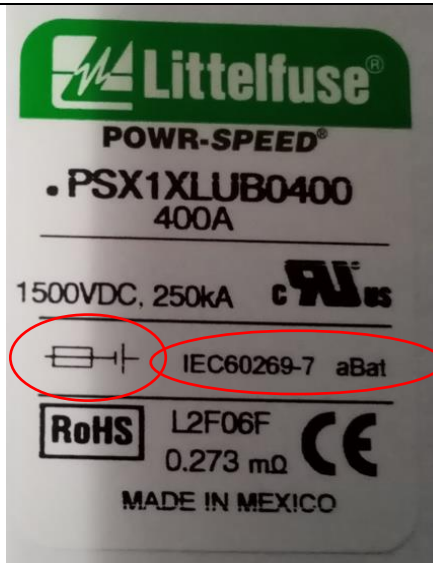

Date: 24th June 2022

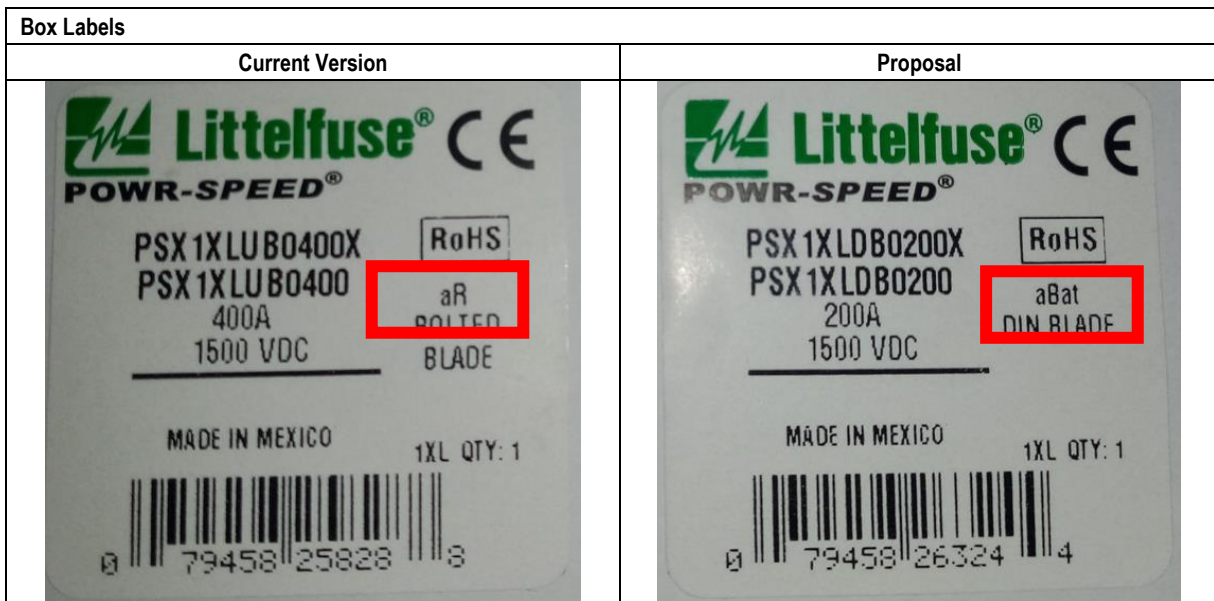

Dear Valued customer:

This notice is to inform changes in PSX Series fuses product label that will be implemented in the manufacturing.

- PSX Series products were initially released with compliance to IEC60269-4 standard with Class aR performance; at time of release of the product there wasn't a fully released Battery Protection Fuse standard.
- Earlier this year IEC Fuse committee released a dedicated Battery Protection Fuse Standard IEC60269-7
- PSX Series products are in compliant to the new released Battery Protection Fuses Standard with Class aBat performance, hence we are updating our product label to reflect this newly released standard information.
- This information is already published in our product datasheet and this change does not affect products fit, form or function. Also there is no certification changes.
- It's a running change and planned date of implementation is 1st July 2022

Please find below current version and proposal for Product and Box Labels.

Product Labels	
Current Version	Proposal
 <p>The current product label for PSX1XLUB0400 400A fuses shows the following specifications: 1500VDC, 250kA, IEC60269-4 aR. The IEC60269-4 aR text and its corresponding symbol are circled in red.</p>	 <p>The proposed product label for PSX1XLUB0400 400A fuses shows the following specifications: 1500VDC, 250kA, IEC60269-7 aBat. The IEC60269-7 aBat text and its corresponding symbol are circled in red.</p>
