

# Vulcascot Cable Protectors

## Product Information

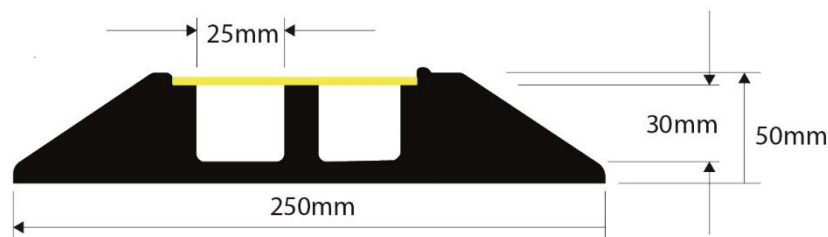

### PROFILE: Heavy Duty HD2

Available in interconnecting 1000mm lengths

### Interlocking 2 channel pedestrian cable protector with highly visible flip top lids.

A heavy duty, 2 channel cable protector which interlinks to form a continuous ramped cable protector. The highly visible yellow hinged lid allows cables to be inserted after the ramps are in position and each section has fixing holes provided for optional permanent fixing.

- A safe method of securing cables on pavements and walkways
- Two large compartments to secure power or cable bundles
- Supplied in 1000mm lengths
- Ideal for use where cables need to be temporarily covered
- Useful safety product for pavement or walkway maintenance
- Suitable for light traffic only, maximum weight loading 10T
