

## 35622 - Nylon Point Blade Probe, 6", Black

### Features

- Ideal for opening plastic cases such as MP3 players, cell phones, laptops and more. Also a great tool for popping out batteries.
- Nylon finish will not mark delicate surfaces
- May be suitable for use in ESD protected areas\*
- Temperature resistant
- Made in the United States of America
- This item is made and stocked in Chino, CA.

\*The hygroscopic (readily accepts moisture) properties of Nylon may make this tool suitable for use around ESD sensitive components after a few minutes of handling the tool with bare hands. Without exposure to moisture or antistatic treatment, Nylon is in the insulative resistance range and charges will not be removed to ground.
