Description

This activator is used for the fast curing of cyanoacrylates, depositing a correct balance of neutralising ions on the surface, stimulating attraction for the adhesive and preparing the surface for bonding.

Applications

This is primarily designed as a plastics compatible accelerator or for post curing outside the bond line. This prevents absorption of the lower viscosity cyanoacrylates into porous items and also helps bridge gaps which decreases polymerisation time.

Useful Notes

Activator can be used to speed cure time by brushing or spraying onto the surface, applying drop wise, the superglue and then over spraying to cure fillets such as on a wire tracking jobs.

Properties

Fast drying activator grades are a blend of flammable solvents. Care must be taken to avoid naked flames. This has the ability to reduce odours and blooming but excessive deposits will increase blooming due to rapid polymerisation.

Specifications

Appearance	: Clear Liquid
Flash Point	: < -40°C
Shelf life	: 12 months unopened
Specific Gravity	: 0.87g/cm ³

Storage

Store in a cool area out of direct sunlight. See MSDS for Safety instructions on the flammability.
Shelf life: 12 months @ 20°C in unopened bottle

Part Number Table

Description	Part Number
Cyanoacrylate Activator, Clear, 200ml	MP-CA55-200
